HEAD N.V. AND SUBSIDIARIES
DIRECTORS' REPORT

Business and Strategy

The Company:

The Company is a leading global manufacturer and marketer of branded sporting goods serving the skiing, tennis and diving markets. The Company has created or acquired a portfolio of brands – Head (principally alpine skis, ski bindings, ski boots, snowboard and protection products, tennis, racquetball, paddle and squash racquets, tennis balls and tennis footwear, sportswear and swimming products), Penn (tennis balls and racquetball balls), Tyrolia (ski bindings), Mares (diving equipment). The Company's key products have attained leading market positions based on sales and reputation and have gained high visibility through their use by many of today's top athletes.

With a broad product offering, the Company supplies sporting equipment, apparel and accessories to all major distribution channels in the skiing, tennis and diving markets, including pro shops, specialty sporting goods stores and mass merchants. The Company´s products are sold through some 37,000 customers in over 85 countries and target sports enthusiasts of varying levels of ability and interest ranging from the novice to the professional athlete. The Company's strongest presence has traditionally been in Europe. The United States is the next largest market for the Company's products after Europe.

The Company generates revenues in its principal markets by selling goods directly to retail stores and to a lesser extent, by selling to distributors. It also receives licensing and royalty income. Winter Sports goods are shipped during a specific period of the year, and therefore the Company experiences highly seasonal revenue streams. Following industry practice, the Company begins to receive orders from its customers in the Winter Sports division from March until June, during which time the Company books approximately three quarters of its orders for the year. The Company will typically begin shipment of skis, boots and bindings in July and August, with the peak shipping period occurring in October and November. At this time, the Company will begin to receive re-orders from customers, which constitute the remaining approximate quarter of its yearly orders. This re-orders inflow may last, depending on the course of weather into the first quarter of the next year. Racquet Sports and Diving product revenues experience almost no seasonality. Revenue from sales is recognised at the time of shipment.

Strategy:

Over the last six decades, the Company has become one of the world's most widely recognised developers, manufacturers and marketers of innovative, high-quality and technologically advanced sporting equipment. The Company's focus continues to be its core products of skiing, racquet sports and diving equipment. In order to expand market share and maximize profitability, the Company's strategy includes an emphasis on marketing and new product development, leveraging further its brands, global distribution network and traditional strength in manufacturing and the Company continuously seeks means for reducing its fixed costs.

Expand Market Share. The Company continues to focus on expanding its market share, by developing innovative products such as our new Supershape ERA 3 ski model with rocker technology, a new allcountry line with AAA-bindings and a walkable ski/tour boot called the Venture within Winter Sports. In our Racquet Sports division, the big story in 2013 was the introduction of graphene technology which allows the redistribution of weight in a racquet for optimal play. Finally, our Diving division has also continued to develop new products including the X-Vision Liquid Mask which has both an improved field of vision and improved comfort.

Rapidly Develop and Launch New Products. The Company intends to continue its tradition of product innovation and development by identifying new product opportunities and moving quickly to launch these products successfully. After the Company identifies a new product opportunity, the Company relies on its in-house research and development department and the manufacturing facilities available to produce the desired product concept. Thereafter, through a combination of the integrated marketing program, high brand awareness and global distribution organisation efficiency the Company is able to introduce the new products to the market rapidly.

In order to further gain strength and momentum in the European Sportswear market and to create deeper synergies with hard goods, the Company has decided to relocate the Sportswear division from London to its offices in Kennelbach, Austria, starting third quarter of 2013. In addition to this, the Company continues to invest in bringing experienced people into the organisation to build a competent product creation and operation excellence in order to develop state of the art product propositions and to establish a competitive supply chain.

Continued cost management. The Company is investigating additional cost savings. Where the Company is confident that quality and proprietary technology will not be compromised, the Company intends to look for and secure further arrangements to manufacture its products in low-cost regions. The Company aims to decrease overhead costs and implements new measures, such as additional relocation of production plants and outsourcing arrangements.

Sales and Distribution:

The Company's products are sold in over 85 countries to approximately 37,000 accounts by its worldwide sales force, sales representatives and independent distributors to serve specialized markets and related distribution channels.

Europe

Sales to customers within Europe accounted for 55.9% of the Company's 2013 sales. Head International GmbH operates as a single distribution company for Winter Sports and Racquet Sports products for several key markets and invoices and ships products to the Company's customers in Switzerland, Germany, Italy, Poland, Benelux and Austria. Mares S.p.A. operates as a single distribution company for Diving products for the European market. As a result, all of the Company's invoicing to customers in these markets, and to European third-party distributors, occurs from Head International GmbH or Mares S.p.A. The distribution companies in these countries function as sales agencies.

North America

Sales to customers in North America accounted for 28.0% of the Company's 2013 sales. The Company distributes Head, Tyrolia, Penn and Mares through its subsidiaries Head USA and Head Canada. In the U.S., Winter Sports, Racquet Sports and Diving have separate sales/marketing organisations and sales forces but share all administrative and logistical functions. The goal is to improve distribution and to increase penetration in North America.

To leverage our quality and innovation consumer recognition we attempt to balance our sales and distribution efforts towards both the specialty and mass markets. While we offer our premium racquet products exclusively towards the quality segment of the market, our lower priced racquet and ball products are also available in mass market distribution channels.

Asia
Sales to customers in Asia accounted for 10.9% of the Company's 2013 sales. In Japan, the Company's largest market in Asia, its Winter Sports and Racquet Sports products are distributed by its own subsidiary distribution unit. In 2011, the Company signed a joint venture agreement to set up a distribution company for Diving products in Japan. For snowboard and protection products, the Company has established a successful cooperation between its subsidiary and USP, a marketing and sales specialist in the action sport market. Racquet Sports and Diving products in Hong Kong are served through the Company's subsidiary in Hong Kong. For the rest of Asia the Company's products are sold only to independent importers or distributors on a wholesale basis.

Other Markets
Sales to customers in other markets accounted for 5.2% of the Company's 2013 sales. These markets mainly consist of Latin America, Africa and Australia. Diving customers in Australia and New Zealand are served through local branches of the Company's subsidiary in Hong Kong. The Company believes the number of countries in these markets in which sales were made exceeded 50 in 2013. Sales of products in these regions occur from Head International GmbH and Mares S.p.A. to independent importers/distributors.

Industry overview:

Winter sports market
The Company defines the winter sports market as the market for alpine skis, ski boots and bindings, snowboard equipment and protection equipment. The Company estimates that there are approximately 50 million skiers and 8 million snowboarders active worldwide and that the market for winter sports equipment, excluding protection, in 2013 was approximately €890 million at the wholesale level, consisting of €310 million for skis, €150 million for bindings, €250 million for boots and €180 million for snowboard equipment. The ski market consists predominantly of Europe, North America and Asia, with Europe constituting approximately 66%, the US and Canada approximately 24% and Japan approximately 10% in 2013. The snowboard market is led by North America, followed by Europe and then Japan.

Ski sales have traditionally been the primary component of the winter sports market, with trends in ski sales directly affecting sales of bindings, ski boots and other ski accessories. The market for skis, however, has undergone a transformation in the past 15 to 20 years by declining from an estimated 6.5 million pairs sold per year worldwide in the late 1980's to approximately 3.3 million pairs in 2013. The reduction in ski sales resulted primarily from a shift in preference among some consumers from skiing to snowboarding in the early 1990's, an absence of significant product innovation, except for the introduction of the carving ski in 1996, the severe decline in the Japanese market and the growing trend towards rental equipment. A dramatic decline in 2007 resulted from the very bad snow conditions worldwide during the 2006/2007 season. After a very bad 2011/2012 season, the 2012/2013 season showed better snow conditions worldwide and most resorts reported an increasing number of skier-days and also retailers have reported a slightly increased demand for alpine ski-equipment.

The snowboard market increased from 0.8 million boards sold in 1995 to a peak of 1.6 million in 2000 and decreased to 0.8 million in 2013 as there is a trend from snowboarding back to freeride and freestyle skiing.

The ski bindings market declined from approximately 5.9 million sets sold per year in the early 1990's to approximately 3.1 million in 2012 and has increased in 2013 to approximately 3.3 million sets.

The ski boot market increased from 3.6 million pairs sold in 2003 to 4.0 million pairs in 2006. In 2007, the market collapsed to 2.8 million pairs of ski boots and since then improved back to 3.7 million pairs sold in 2013.

Racquet sports market

The Company defines the racquet sports market as the market for tennis, racquetball, paddle and squash racquets, accessories and footwear and for tennis balls and racquetball balls and markets racquet sports products globally. Based on external market information and internal estimates, we believe that the market for tennis racquets in 2013 declined by almost 8% in the U.S., the world's biggest market, while Europe faced a decline in the tennis racquet market of around 5% in both revenues and units. We believe that the market in Asia remained flat compared to 2012. We estimate the global market in tennis racquets in 2013 is approximately 8 million units with a wholesale value of €300 million.

The Company estimates that worldwide sales of tennis balls were approximately 24 million dozens with a wholesale value of approximately €206 million. The market was stable in most regions during 2013.

Diving market

The Company defines the diving market as the market for diving masks, fins, suits, BCDs (Buoyancy Control Devices), regulators, computers and diving accessories. The Company estimates the worldwide wholesale market in 2013 was approximately €400 million. The Company believes that the diving market was declining in 2013 in EMEA (Europe, the Middle East and Africa) and was growing in Asia and the United States in the range of 5%. The European economic crisis and ongoing political turbulences in the Middle East made the diving industry one of the most affected sporting good categories, as the sport is expensive and requires travelling.

The diving industry is fragmented with well over 30 brands. While there are various companies which produce a number of diving products, Mares is the only company that designs and manufactures a complete line of products under one trademark.

Sportswear market

The Company defines its sportswear market as the European market for tennis and skiwear. In other countries outside Europe, Head sportswear is a licensed business. The distribution of sportswear for tennis and skiwear is fully integrated into the Company´s distribution units.

While the tennis apparel market is dominated by large international brands like Nike and Adidas with smaller brands having local importance, the skiwear market is regionally very much fragmented.

HEAD N.V. AND SUBSIDIARIES
DIRECTORS' REPORT

Business development:

Winter Sports
The 2013/2014 winter season started with some early snow in all important regions worldwide. Retailers in Europe, North America and Japan reported a good start to the season and we have already experienced significant reorders in the October through to December period. Especially in Europe, and here in contrast to other seasons also in the south of Europe, we have experienced a record number of tourists in the ski resorts over the Christmas period. North America was also benefitting from excellent snow conditions and is reporting a very good season. Japan has developed less favourable. After a good start it got warm again which negatively affected the conditions in the ski resorts. The same is true for Scandinavia. In the northern part of the Alps we experienced extremely warm weather after Christmas which causes some concern for the future.

As per January 1, 2014, the Company completed the acquisition of Catis s.r.o and its subsidiary. Catis has historically assembled between 1.0 and 1.5 million bindings for Head each year in a dedicated factory in the Czech Republic (see also Note 31).

Racquet Sports
The positive momentum experienced in the market in the last quarter of 2012, when new products were launched, did not continue into the start of 2013 and the first half of the year was slow. Sales picked up in the second half of the year, but still the market did not fully recover and reach the sales levels achieved in the prior year. In addition to the timing of product launches, the uncertain state of the economy in various European countries as well as in the United States continued to impact the racquet sports market; consumers were not willing to commit to purchases.

Diving
The political turmoil in Egypt and the continued economic-crisis in Southern Europe affected European markets. Nevertheless, the Company believes Mares could increase its market shares in most markets as a result of new advanced products and improved operations. Mares continued to strengthen its presence in the Asia Pacific region.

The Head swimming line keeps developing positively, Head athletes won a number of medals at the World and European Championships 2013.

Head announced the acquisition of the 2nd largest dive-education agency SSI as of January 1, 2014, which is a major initiative to complete the product and service offer for divers, dive wholesalers and dive-operators (see also Note 31).

Sportswear
The development of the skiwear market is clearly linked to the timing and levels of snowfall over Europe as well as local economic conditions.

The 2012/2013 ski season started well with some early snow over the Alps and a second wave of snow in December which in return had positive impact for our business in 2013 versus 2012. For the 2013/2014 season snow arrived early over the Alps, but the weather then became warmer particularly in the Northern Alps which has had a slowdown effect on re-fill orders.

Similar to skiwear the tennis apparel market in Europe is also linked to the weather but also the economy and fashion trends continue to impact the business across the region. While it is believed that the tennis market is relatively flat across the European region our business is stable with solid growth across most subsidiary markets.

Profitability

Income statement:

Total net revenues increased by €15.5 million, or 4.5%, to €358.7 million from €343.2 million in the comparable 2012 period. This increase was driven by higher sales in Winter Sports and Racquet Sports, partly offset by exchange rate movements.

Winter Sports revenues increased significantly by €13.4 million, or 9.1%, to €160.0 million from €146.6 million in the comparable 2012 period. This increase was mainly due to higher volumes in skis and ski boots in most markets, partly offset by exchange rate movements.

Racquet Sports revenues increased by €2.5 million, or 1.8%, to €144.8 million from €142.3 million in the comparable 2012 period. This increase was mainly due to higher volumes for balls and a favourable product mix for racquets, again partly offset by exchange rate movements.

Diving revenues increased by €0.5 million, or 0.9%, to €52.3 million from €51.8 million in the comparable 2012 period. This increase was mainly due to higher sales in North America and Asia.

Sportswear revenues increased by €0.7 million to €6.6 million, or 12.3%, from €5.8 million in the comparable 2012 period. This increase was mainly due to higher sales for Winter Sportswear.

Licensing revenues decreased by €0.6 million, or 10.4%, to €5.2 million from €5.8 million in the comparable 2012 period.

Sales deductions consist of sales incentives, which are earned by the Company's customers subsequent to delivery of its product, including cash discounts, volume rebates and other than cash consideration. Sales deductions increased by €1.1 million, or 11.6%, to €10.2 million from €9.1 million in the comparable 2012 period due to higher sales in all divisions.

Cost of Sales. Cost of Sales increased by €6.5 million, or 3.1%, to €213.8 million from €207.3 million in 2012. This increase was mainly due to higher production volumes.

- Variable production costs increased by €5.8 million, or 3.3%, to 182.5 million from €176.7 million in 2012 mainly due to higher production volumes.
- Fixed production costs increased by €0.5 million, or 2.5%, to €21.0 million from €20.4 million in 2012.
- Research and development expenses remained almost unchanged at €10.3 million compared to 2012 (€10.2 million).

Gross Profit. Gross profit increased by €9.0 million, or 6.6%, to €144.9 million from €135.9 million in the comparable 2012 period. Gross margin increased to €40.4% in 2013 from 39.6% in the comparable 2012 period.

Selling and Marketing Expense. Selling and marketing expense increased by €6.0 million, or 6.1%, to €104.1 million from €98.1 million in the comparable 2012 period. This was mainly

due to higher advertising costs in our Racquet Sports division, higher departmental selling costs in our Racquet Sports and Sportswear divisions and higher commissions and shipment costs.

General and Administrative Expense. General and administrative expense increased by €1.7 million, or 6.0%, to €29.6 million from €27.9 million in the comparable 2012 period mainly due to higher business unit administration and warehouse costs.

Share-Based Compensation Expense/Income. In 2013, the Company recorded an expense of €0.1 million relating to the Stock Option Plans which was mainly due to the increase of the share price at December 31, 2013 compared to December 31, 2012. In 2012, the Company recorded an income of €0.1 million relating to the Stock Option Plans which was mainly due to a decreased volatility in the share price in 2012.

Other Operating Income, net. In 2013, the Company recorded other operating income, net of €0.9 million compared to €0.1 million in 2012. The income in 2013 was mainly due to the release of a provision for an environmental matter (see Note 14).

Operating Profit. As a result of the foregoing, an operating profit of €12.1 million was recorded in 2013 compared to an operating profit of €10.2 million in the comparable 2012 period.

Interest and Other Finance Expense. For the year ended December 31, 2013, interest and other finance expense decreased by €0.8 million, or 13.9%, to €5.1 million from €5.9 million in the comparable 2012 period. This decrease was mainly due to lower interest expenses for our long-term debt in 2013.

Interest and Investment Income. Interest and investment income decreased by €0.2 million to €0.5 million in 2013 compared to €0.8 million in 2012.

Other non-operating Income, net. In 2013, the Company recorded other non-operating income, net of €0.2 million compared to €0.1 million in 2012, mainly consisting of foreign exchange gains.

Income Tax Expense/Benefit. For the year ended December 31, 2013, income tax expense amounted to €2.4 million compared to €2.7 million in 2012. Income tax expense in both years was driven by current income tax expense of €1.9 million in 2013 and €2.1 million in 2012. Deferred income tax expense amounted to €0.5 million in 2013 and €0.6 million in 2012 mainly resulting from the use of tax losses in some of the Company´s operating countries.

Profit for the year. As a result of the foregoing factors, the Company reported a profit of €5.3 million in 2013 compared to a profit of €2.5 million in 2012.

Financing:

Payments from the Company's customers are the principal source of liquidity. Additional sources of liquidity include its credit facility, financing under capital lease arrangements and vendor financing. The cash provided by these sources has a variety of uses. Most importantly, the Company must pay its employees and vendors for the services and materials they supply. Additional uses include capital expenditures, investments, development of new products, payment of interest, extension of credit to the Company's customers, and other general funding of the Company's day-to-day operations.

Cash provided by operating activities decreased by €19.8 million to €5.0 million compared to €24.8 million in the comparable 2012 period. This was mainly due to adverse working capital movements, mainly in accounts receivable and inventories. Cash used for investing activities remained almost unchanged at €8.4 million in 2013 compared to 2012 (€ 8.4 million). Cash provided by financing activities amounted to €36.0 million in 2013 compared to €0.6 million in the comparable 2012 period. This was mainly due to the issuance of the new Bond in the third quarter of 2013 and to an increase in short-term borrowings, partly offset by the redemption of the Senior Notes during the second quarter of 2013 (see Note 15).

As of December 31, 2013, the Company had €136.7 million of total debt, consisting of €59.3 million Bond due 2018, €9.0 million long-term obligations under a sale-leaseback agreement, three mortgage agreements due 2018 at the latest totaling €8.3 million, a liability against a Company´s venture partner of €2.6 million and €21.4 million other long-term debt comprising of loans in Italy, Japan, USA and Austria. In addition, the Company used lines of credit with several banks in Austria, Japan, France and the United Kingdom of €36.1 million.

As of December 31, 2013, the Company had €71.8 million cash on hand, €6.5 million restricted cash and €5.0 million available-for-sale financial securities (money market funds) which are restricted.

The Company believes that its current level of cash on hand, future cash flows from operations, its Bond and other facilities are sufficient to meet the operating needs for the foreseeable future.

Research and Development

The Company believes that it is an industry leader in the development of innovative and technologically advanced sports equipment and apparel. Its research and development groups identify consumer needs and shifts in consumer preferences in order to develop new product ideas and concepts to satisfy such needs or preferences. The Company believes that its high level of expertise is evident in all its product lines. The Company incurred research and development costs amounting to €10.3 million and €10.2 million for the year ended December 31, 2013 and 2012, respectively.

Capital Expenditures

A significant amount of the Company's annual capital expenditure is invested for the maintenance of current facilities including the moulds, tools and equipment. Some product lines change annually as new products are introduced, while others are in use for several years.

In both 2013 and 2012, the Company spent approximately €8.5 million on facilities and equipment maintenance (upkeep, replacement and/or improvement). In the years 2014 to 2016, the Company expects to spend approximately €26.9 million on investment in property, plant and equipment, including expenditures for maintenance of the Company's facilities and equipment, and €33.2 million on research and development. The Company expects that these expenses will be financed through its operating cash flow. These expenses will be primarily for the design and manufacturing of products that are scheduled to be introduced and existing products which the Company expects to continue selling during the period.

Employees

As of December 31, 2013, the Company employed 2,193 people worldwide compared to 2,090 at the end of 2012.

Employees by categories:

	For the Years ended December 31,	
	2013	2012
Manufacturing	1,360	1,286
Engineering and Patent	93	98
Selling and Advertising	451	428
Warehouse	138	129
Business Unit Administration	151	149
Total	2,193	2,090

Employees by geography:

	For the Years ended December 31,	
	2013	2012
Austria	518	494
Italy	202	197
Czech Republic	497	410
Other (Europe)	290	286
North America	117	112
China	520	545
Other	49	46
Total	2,193	2,090

The Company believes that its employee relations are generally good. In Austria, most of the employees are subject to collective labor agreements covering the metal and wood processing industries. Collective labor agreements have also been entered for some employees in other countries.

Outlook

Product Outlook:

Winter Sports
In Winter Sports the Company sees a continued trend towards the development of specific new segments, such as freeride skis with rocker technology and freestyle - park & pipe skis, but also specific products for women. The Company still experiences a continued trend towards rental equipment at the expense of low price ski packages while high-end models, such as the Supershape models or Worldcup Race skis, continue to sell well. For 2014, a completely new line of skis has been developed for women and will help to improve the position of the Company in this segment where the brand has so far been underrepresented. The skis will feature lightness, balance and control with the introduction of the graphene technology in the ski construction. As we had a lot of exposure with our sponsored athletes at the Olympic Winter Games in Sochi in February 2014, the Worldcup and the Supershape lines will be the other main focus in our 2014 sales strategy.

Following the introduction of the Adrenalin binding with a walking mechanism in 2012, the Company has introduced a complete range of freeride and touring bindings called AAA series with big success in 2013. In 2014, the Company will introduce, together with the new Head women ski line, a series of new SLR bindings for women and a new TriFlex plate for the Supershape skis which enhances performance.

In the ski boot market, customising is becoming an important trend. Head is offering a combination of shell adjustment – adaptive fit technology – and customisable innerboot – perfect fit – which, we believe, provides the best level of precision, comfort and control.

Furthermore, in 2014 the Company will launch the Venture ATX, a boot designed for allmountain skiing with a walking device, Vibram sole and an intuition liner.

In snowboards, Head has introduced the framewall concept for boards in 2013 and received an ISPO product award for the technology. In 2014, this concept is expanded to a significant part of the snowboard range, for both retail and rental.

On the protection side, the Company entered the racing segment with the introduction of the Stivot helmet and goggle series and the Flexor body protection series. For 2014, the Company has developed a carbon helmet which fulfills the new FIS regulations for race helmets but maintains its slim look. Further, together with Montana, the Company offers the first fully integrated helmet storage and drying solution for rental helmets called SD+D. Further developments in the rental helmet segment will be compatible with the system.

Racquet Sports
New products in all categories were launched by the Racquet Sports division in 2013.

The Company has continuously focused on developing and introducing high performance tennis racquets. In 2013, the new technology called Graphene, which is integrated into two new racquet series, the Speed series and the Instinct series, has successfully been introduced. Graphene significantly improves both power and maneuverability of the racquet and provides professional players as well as recreational players more speed and easy handling. Both series are endorsed by top ranked professional players: the Graphene Speed series is endorsed by Novak Djokovic – winning the Australian Open in 2013 - while Maria Sharapova endorses the

Graphene Instinct series. Both series have created very positive momentum at retail and at consumer level. The Company has expanded the range of graphene tennis racquets in 2014 by launching the Graphene Radical series and the Graphene Prestige series.

Head's athletes who endorse Head's products have had a very successful year winning two Grand Slam titles and four players finished the year in the top 10 of the ATP ranking. The great successes of Head players on the ATP and WTA Tour supported sales of tennis racquets in 2013 significantly and we will continue with our endorsement strategy of world class tennis players.

The Company, as the market leader in tennis balls in the U.S., managed to further grow its market share and climbed to a historical peak of around 60% of the total U.S. tennis balls market in units. The Company will focus on keeping its market position in the U.S. and will put even more focus on expanding the tennis ball business in Europe and in Asia by developing and introducing new products in order to improve the overall tennis ball product mix.

In tennis accessories the Company has continued growing the business through the launch of a new attractive bag series and developing new string products. Also in 2014 new products in the accessories category will be introduced: a new attractive range of bags which match with racquet designs as well as new innovative string products.

The Company is also focusing more on growing the tennis footwear business. A new range of performance tennis shoes that coordinate with tennis apparel and tennis bag designs has been developed and will be launched in early 2014.

The new Head custom made service for tennis racquets was introduced at the end of 2013. We offer tennis players the opportunity to customise their racquet online with their individual racquet specifications and purchase their custom made product online directly from Head.

Diving
The Diving division launched a range of product innovations with a focus on performance and comfort. The Diving division's latest product launches were a new X-Vision mask-range and buoyancy control devices. A new computer and regulator will be introduced early 2014.

Sportswear
Head has crafted sportswear to share the professionalism, level of thought and technology that the most demanding athlete expects. We combine the strength of our brand´s heritage of world class performance with the inspiration and insights of our athletes. Together we develop premium sportswear collections with the right balance of function, lightness and precision combined with a modern twist. We need to continuously focus our efforts on product optimisation, creating lead styles and identifying margin drivers in order to create significant, but healthy growth for the Company.

In 2013 the tennis collection featured targeted use of wicking, breathability and cooling elements paired with unexpected twist of bold graphics allowing for on court performance, comfort and statement. The 2014 collection takes it a step further with inspired tailoring, intelligent craftsmanship and bold colors to best equip the tennis player on and off the field of play. The collection is represented by three diverging lines: performance, vision and club.

Winter 2013/2014 marked the introduction of 3D construction in our flagship jacket allowing for maximum speed and freedom of movement along with a 3D comfort collar. In the allterrain range, we have used a light fit technology construction concept, which creates high

performance, warm and seemingly weightless garments for men and women. For Winter 2014/2015 the HEAD 360° concept is the integrated approach ensuring our apparel is designed to respond to skiers needs: comfort management, ergonomics and pro engineering from the pillars of our research, design and development process aimed for the ultimate alpine experience.

Environmental Matters:

The Company's operations are subject to European Union, federal, state and local laws, regulations and ordinances relating to the operation and removal of underground storage tanks and the storage, handling, generation, treatment, emission, release, discharge and disposal of various materials, substances and wastes. The nature of the Company's operations exposes it to the risk of claims with respect to environmental matters and the Company cannot assure you that material costs or liabilities will not be incurred in connection with such claims.

Based on the Company's experience to date, the Company believes that future cost of compliance with environmental laws, regulations and ordinances, or exposure to liability for environmental claims, will not have a material adverse effect on the Company's business, operations, financial position or liquidity. However, future events, such as changes in existing laws and regulations, or unknown contamination of sites owned or operated by us (including contamination caused by prior owners and operators of such sites), may give rise to additional compliance costs which could have an adverse effect on the Company's operating results and financial condition.

Circumstances affecting future turnover and profitability:

As a manufacturer and distributor of branded sporting goods, the Company's revenues are affected by the overall economic trends of the Company's principal geographic markets, mainly Europe, but also the United States and Japan, and related changes in consumer spending on leisure goods. Weather can also affect the Company's revenues. For example, a lack of snow in a particular area in a particular season will result in fewer purchases of skiing and snowboarding equipment and poor weather at a diving location may reduce interest in the sport and related equipment purchases. The Company believes its global geographic penetration and diversification of sports products help to mitigate any localized adverse impacts from weather. Other factors that can affect its revenues are consumer preferences for renting versus purchasing equipment and the general level of interest in the sports for which the Company produces equipment. In addition, the rate of leisure travel can affect its revenues as purchases of its equipment are often related to customers travelling to ski and diving destinations.

Most of the Company's revenues are denominated in euro, the functional currency of its European operations, and in 2013, approximately 32% was denominated in U.S. dollars. The Company's revenues are thus affected by movements in the exchange rate of the U.S. dollar and other currencies against the euro. The Company's revenues are also affected by fluctuations in the value of the currency in which the products are sold relative to the value of the currencies in which production expenses are incurred. For example, appreciation of the U.S. dollar against the euro may adversely affect margins from its products manufactured on a U.S. dollar-cost basis and sold in Europe.

Factors Affecting Expenses

The Company separates its principal expenses into:

- cost of sales;
- selling and marketing expenses;
- general and administrative expenses; and
- interest expense.

The major components of cost of sales are raw materials, cost of third party manufacturers, payroll and energy expenses related to the manufacturing of the Company's products. Depreciation of the Company's manufacturing equipment and production sites, as well as research and development expenses associated with the development of the Company's products, are also included in this category.

Selling and marketing expenses are comprised primarily of advertising expenses (including the sponsorship of professional athletes) and payroll expenses related to the selling department. Also included in this category are commission payments to sales teams. General and administration expenses include warehousing expenses and various administrative costs.

In both 2013 and 2012, the Company spent approximately €8.5 million on capital expenditures which cover mainly the replacement, maintenance and expansion of the Company's facilities and equipment, including moulds and tools. Some product lines change annually as new products are introduced, while others are in use for several years. Historically, these expenditures were financed through its operating cash flow. The Company expects its annual capital expenditures to remain stable during the next three years due to the fact that most of its restructuring programs and production outsourcing were finalized in 2010.

In connection with ordinary share options granted to officers, the Company has recorded share-based compensation expense of €0.1 million and income of €0.1 million in 2013 and 2012, respectively. As of December 31, 2013, other long-term liabilities with regards to the Company's stock options amounted to €0.5 million. The increase compared to December 31, 2012 (€0.4 million) is mainly due to the increase of the share price at December 31, 2013 compared to December 31, 2012. The change in fair value will be recognised as income or expense over the remaining life of the cash-settled options. Any further stock option grants will result in additional expense being recognised.

The Company's expenses, as reported in euro, are also affected by movements in the exchange rate of the euro against the currencies of the countries in which the Company operates. Of the Company's cost of goods sold and other operating expenses, approximately 58% is recorded in euro whereas approximately 39% is recorded in U.S. dollars. Because a portion of the Company's revenues are generated in U.S. dollars, a depreciation of the euro against the U.S. dollar would increase the Company's revenues when translated into euro.

Subsequent Events:

For information regarding the subsequent events, it is referred to Note 31 of the consolidated financial statements.

Risk Report

Some of the risks described below are beyond the Company's control and cannot be quantified nor can the likelihood be expressed. Management seeks to keep the harm limited by following the strategy of diversification of products and geographic locations. For those risks assessable management tends to define the Company's strategy by focus on risk minimization. When defining the Company's strategy management evaluates risks and balances this risk with the potential return. Management is willing to take calculable risks in reaching Company's objectives.

Industry and business risks:

The sporting goods industry is highly competitive and includes many regional, national and international companies, some of which have achieved substantial market share. The Company competes primarily on the basis of product features, brand recognition, quality and price, and the failure to remain competitive could adversely affect its results of operations and financial condition. Some of the Company's competitors offer types of sports products that the Company does not sell, and some of its competitors are larger and may have greater financial and other resources than the Company has. The Company's success also depends partly on its ability to anticipate and respond quickly to changing merchandise trends, consumer taste and consumer preferences. Any failure in responding could adversely affect consumer acceptance of the Company's brand names and product lines and could harm its business.

The Company mitigates these risks by employing experts in the industries in which it operates, constantly reviewing the behavior of the Company's competitors and customers and having dedicated proficient research and development teams designing consumer driven products.

The Company's production is dependent on the timely availability of certain raw materials whose prices are driven by the commodity price development on the world market. In manufacturing, we use, among other items, plastic components for bindings, ski boots and diving fins, carbon fibers for racquets, rubber and felt for tennis balls and metal parts for binding components and ski edges. Changing raw material prices historically have had a material impact on the Company's earnings and cash flows, and are likely to continue to have a significant impact on earnings and cash flows in future periods.

Historically, the Company has generally not been able to pass on to the Company's customers all increases in costs resulting from raw material and energy prices, and has sought other means, particularly through the restructuring of the Company's production processes, to maintain operating margins. The Company maintains relations with at least two suppliers for each of the core raw materials and enters into price negotiations at least yearly. A yearly supplier evaluation process assures that suppliers meet the Company's targets.

The Company outsources a substantial portion of its manufacturing to third parties in Europe, such as Czech Republic (binding assembly) and Bulgaria (diving products), and in Asia, such as China and Thailand (tennis racquets, accessories, snowboard and protection products, sportswear, diving and swimming products). As a result of this outsourcing, the Company is dependent in part on the performance of third-party suppliers in order to deliver quality products in a timely manner. The Company is also increasingly subject to risks relating to the local economic and political conditions in those countries to which the Company outsources its manufacturing operations.

The Company maintains good relations with its third-party suppliers as a professional cooperation is essential to generate high quality products. Third-party suppliers are integrated in the Company's quality management and internal control framework.

Economic conditions, weather and other factors beyond the Company's control:

The Company and the sporting goods industry in general are dependent on the economies in which the products are sold, and in particular on levels of consumer spending. Economic conditions affect not only the ultimate consumer, but also retailers, the Company's primary direct customers. As a result, the Company's results may be adversely affected by downward trends in the economies in which its products are sold. Adverse weather also can cause a significant decline in the Company's sales, as in 2012 when the poor snow conditions in Europe during the 2011/2012 season substantially reduced Winter Sports revenues and negatively impacted the consolidated operating results. In addition, the occurrence of events that adversely affect economies or international tourism, such as terrorism, regional instability or natural disasters continue to adversely affect leisure travel and related discretionary consumer spending, which can have a particularly negative impact on the Company's diving business.

The Company has mitigated these risks where possible by having counter seasonal products and by operating globally so the results are not unduly influenced by the economy of one country.

Legal and tax risks:

As of December 31, 2013, the Company recognised €52.1 million of deferred tax assets, mainly on Austrian tax losses carried forward. The Company believes it is probable that these deferred tax assets will be realized. Austria and some other countries allow an unlimited carryover of net operating losses. However, a change in income tax law lowering the applicable tax rate or limiting of carryover, requiring the Company to write down a portion of its deferred tax assets, would cause a significant income tax expense and negatively affect the Company's net income and reduce total assets.

The Company closely monitors any development in local tax legislations and is in permanent contact with its external tax consultants to evaluate actions that could be taken and the effect on the Company's results.

Some of the Company's products are used in relatively high-risk recreational settings, and from time to time the Company is named as a defendant in lawsuits asserting product liability claims relating to its sporting goods products. To date, none of these lawsuits has had a material adverse effect on the Company, and the Company does not believe that any lawsuit now pending could reasonably be expected to have such an effect. The Company maintains product liability and general liability insurance coverage. No assurance can be given that such insurance will continue to be available at an acceptable cost or that such coverage will be sufficient to cover one or more large claims, or that the insurers will not successfully disclaim coverage as to a pending or future claim.

The Company follows up on product returns, permanently researches to offer high quality products and has established high product quality standards permanently examined by the Company's quality management.

The Company holds several hundred patents and trademarks, most of which are filed in multiple jurisdictions, including Europe, the United States and Asia. The Company's major trademarks are registered in its key markets and numerous other countries. The Company

believes its patents and trademarks to be among its most valuable marketing assets and generally seeks protection for them in countries where significant existing or potential markets for the Company's products exist. The Company believes it has taken adequate measures to protect its proprietary information, trade names and trademarks in all its major markets. Litigation may be necessary to defend against claims of infringement, to enforce the Company's patents or trademarks, or to protect trade secrets and could result in substantial costs for the Company.

The Company's operations are subject to European Union, United States, Chinese and other national and local laws governing, among other things, water pollution, air pollution, noise pollution and hazardous substance discharges. The Company believes that its business, operations and facilities have been and are being operated in compliance in all material respects with applicable environmental and health and safety laws. However, the operation of manufacturing plants entails risks in these areas. As a result, the Company cannot assure that it will not incur material costs or liabilities. In addition, the Company could incur significant costs in order to comply with any future European Union, national or local environmental and health and safety laws that may be adopted, or to respond to stricter interpretations or stricter enforcement of existing laws in the future.

Quality management issues, trademark and patent rights protection and the observance and compliance with the respective national and local laws are supported by dedicated quality management, legal, and patent and trademark departments.

Other risks:

Head Sports Holdings N.V. and its affiliates, directly and indirectly, controlled approximately 66.28% of the Company's issued ordinary shares, as of December 31, 2013. Head Sports Holdings N.V., a Netherlands Antilles corporation, and its shareholders are controlled by Mr. Johan Eliasch, the Company's CEO and his family members. Head Sports Holdings N.V. has the power to approve the nominations of the Company's executive officers, the Supervisory and Management Boards, change the Company's core business, cause us to engage in transactions with affiliated companies, cause or restrict the sale of the Company's assets, control the Company's dividend policy and make other fundamental corporate decisions.

Under the Company's articles of association, a Dutch foundation called Stichting Head Option Plan ("the Stichting") has the power to nominate all members of the Management Board, appoint one-third of the members of the Supervisory Board and nominate the remaining members of the Supervisory Board. The Board of the Stichting is controlled by Head Sports Holdings N.V.

The special power of the Stichting ceases when Mr. Johan Eliasch or his affiliates or family members cease to control the Stichting or cease to beneficially hold any of the Company's ordinary shares. In general, a two-thirds majority of shareholders voting at a general meeting of shareholders may remove members of the Management and Supervisory Board, and the articles of association, including the rights of the Stichting, also may be amended (at proposal of the Management Board and with approval of the Supervisory Board) by a two-thirds majority of shareholders. Therefore, as a result of his control over the Stichting, Mr. Johan Eliasch with his family members will retain the power to nominate and essentially control the election of the Management and Supervisory Board members and other executive officers so long as Mr. Johan Eliasch holds any of the Company's ordinary shares or until there is an amendment to the articles of association impairing the rights of the Stichting.

Financial risks:

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance. The Company uses derivative financial instruments to hedge certain risk exposures. For further description of the financial risks, it is referred to Note 3 of the consolidated financial statements.

Risk management and internal control system:

The Management Board is responsible for designing, implementing and maintaining adequate internal controls over financial reporting and other management information suitable for running the business.

The Company's main features of internal control systems are as follows:

- Lean organisational structure and clear defined authority and accountability
- Frequent reporting and analysis against approved budget and monitoring of business risks
- Appropriate infrastructure, systems, controls and staff
- Code of Conduct is established

Assurance on the functioning of the internal control systems, and on their effectiveness, is obtained through management reviews, internal testing of certain aspects of the internal financial control systems and control self assessment.

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the Company's internal control and risk management system for the financial year ended December 31, 2013.

The objective of these systems is to manage, rather than eliminate, the risk of failure to achieve business objectives. Accordingly, they can only provide reasonable, but not absolute assurance against material misstatement or loss.

On basis of the foregoing and the explanations contained in the Risk Report section in this annual report, the Management Board has confirmed that to its knowledge:

- The Company's internal risk management and control systems provide a reasonable assurance that the Company's financial reporting does not contain any material inaccuracies; and
- the Company's risk management and control systems functioned properly in 2013.

The Management Board

Our Management Board currently has four members as of December 31, 2013, whose names, functions and biographies are set forth below.

Name	Age	Title
Mr. Johan Eliasch	52	Chairman of the Management Board and Chief Executive Officer
Mr. Ralf Bernhart	62	Member of the Management Board and Deputy Chairman of the Management Board
Mr. Günter Hagspiel	50	Member of the Management Board and Chief Financial Officer
Mr. Georg F. Nicolai	61	Member of the Management Board

Mr. Johan Eliasch has served as Chairman of the Management Board of Head N.V. and Group Chief Executive Officer since September 1995. He is Chairman of Equity Partners, London Films, Co-Chairman of Cool Earth, President of Global Strategy Forum, non-executive Chairman of Investcorp Europe, non-executive director of CV Starr Underwriting Agents, advisory board member of Brasilinvest, Société du Louvre, Centre for Social Justice, the British Olympic Association, and member of the Mayor of London's and Rome's International Business Advisory Council. He is patron of the Stockholm University and a trustee of Kew Foundation. He is the former Special Representative of the Prime Minister of the United Kingdom (2007-2010). He is actively involved in preservation of Rainforest in the Amazonas.

Mr. Ralf Bernhart has served as the Chief Financial Officer of Head N.V. since October 2000 until May 2009. He was a member of the HTM Supervisory Board in 1995 prior to becoming a member of the HTM Management Board in 1996. Prior to joining Head N.V., from 1990 to 1995, Mr. Bernhart was a member of the Executive Board of Hafslund Nycomed Pharma AG, Austria, a leading pharmaceutical company. On May 28, 2009, Mr. Bernhart resigned from his position as Chief Financial Officer of Head N.V. Since May 2009, Mr. Bernhart is serving as the Deputy Chairman of our Management Board.

Mr. Günter Hagspiel joined Head Sport GmbH in May 1996. After working in Controlling for two years in Austria, he went on an international assignment to the U.S. to become the Controller of Head USA, Inc. In 2001, Mr. Hagspiel was promoted to CFO and COO of the U.S. Company. Since August 2005, he has served as Vice President Finance & Controlling in Austria and was appointed Managing Director of Head Sport GmbH. Prior to joining Head, Mr. Hagspiel was working as a Management Consultant at the Management Zentrum St. Gallen (MZSG) and as Manager at IBM in Vienna. Since May 2009, Mr. Hagspiel is serving as a member of the Management Board and the Chief Financial Officer of Head N.V.

Mr. George F. Nicolai was a member of the management team of Intertrust Netherlands from 1989 until 2003, and continues to act as a non-executive director. After finishing his law degree at the University of Utrecht, he joined Pierson Heldring & Pierson which became Mees Pierson and later was part of Fortis Bank and now privately owned by Blackstone serving in a variety of executive positions, both in The Netherlands and abroad. He currently also serves as a member of the board of directors of several Dutch subsidiaries of international companies such as Pearson Plc, Pirelli and KFC and as chairman-member of several foundations.

The members of the Management Board are collectively responsible for the management of the Company. Notwithstanding the collective responsibility within the Management Board, certain tasks and responsibilities have been assigned to individual members.

Information pursuant to Decree Article 10 Takeover Directive (Besluit artikel 10 Overnamerichtlijn) and Section 392 paragraph 1 sub-paragraph e Book 2 Dutch Civil Code

a) Structure of the capital:

The total nominal value of the Company's issued share capital amounts to €921,748 and the Company's issued share capital consists of 92,174,778 ordinary shares of €0.01 nominal, each.

The Company's shares have been listed on the New York Stock Exchange and the Vienna Stock Exchange effective from September 28, 2000 in connection with the initial public offering. Effective from March 31, 2008, the Company's shares have been delisted from the New York Stock Exchange.

As of June 4, 2009, the termination of the Company's registration and reporting obligations under the United States Securities Exchange Act of 1934, as amended (the "Exchange Act") became effective, 90 days after the filing of a Form 15F with the United States Securities and Exchange Commission.

As per December 31, 2013, out of 43,324,611 listed shares, 42,666,588 shares are bearer shares and 658,023 shares are in registered form.

b) Restrictions on the transfer of securities:

The shares are freely transferable.

c) Significant direct and indirect shareholders:

Pursuant to the Dutch Financial Markets Supervision Act (Wet op het financieel toezicht), the Authority Financial Markets has been notified about the following substantial shareholdings:

Head Sports Holdings N.V., a Netherlands Antilles corporation and its shareholders, controlled by Mr. Johan Eliasch and his family members, holds 61,089,243 shares, or approximately 66.28%, of Head N.V.'s issued shares as of December 31, 2013.

As per December 31, 2013, no other person is known to us to hold 5% or more of the Company's issued shares.

d) Holders of any securities with special control rights:

All shares carry equal rights. None of the shares carry special control rights.

e) System of control of employee share scheme:

Plan 2005

In May 2005, at the Annual General Meeting the shareholders approved the Head N.V. Executive Stock Option Plan 2005 ("Plan 2005"). The Plan 2005 provides for grants of 3,874,691 stock options to certain officers and key employees of the Company and its subsidiaries. In accordance with IFRS 2 the Plan 2005 is treated as cash-settled share-based plan, as participants have no right to receive shares. As of December 31, 2013, a total of 3,669,346 options were granted under the terms of the Plan 2005.

The exercise price for all stock options granted under the Plan 2005 was fixed at inception of the Plan 2005. Options generally vest over a period of 4 years. The Chairman and Chief Executive Officer received 1,937,346 options under this grant. Options have a maximum term of 10 years. As at December 31, 2013, 205,345 options were available for grant under the Plan 2005 and 3,212,096 options are currently exercisable.

For further information regarding the Stock Option Plans it is referred to Note 23.

f) Restrictions on voting rights:

There are no restrictions on voting rights.

g) Agreements between shareholders known to the company and which may result in restrictions on the transfer of securities and/or voting rights:

As far as known to Head N.V., there is no agreement involving a shareholder of Head N.V. that could lead to a restriction of the transferability of shares or of voting rights on shares.

h) Rules governing the appointment and replacement of board members and the amendment of articles of association:

The Company has established a Dutch foundation, Stichting Head Option Plan (the "Stichting"), the Board of which is controlled by Head Sports Holdings N.V. and Mr. Johan Eliasch jointly. Head Sports Holdings N.V. is an entity that is controlled by Mr. Johan Eliasch and his family members. The Stichting's sole corporate body is its Board; it does not have any members or shareholders. The Stichting has the power to nominate all members of the Management Board of the Company, to appoint one-third of the members of the Supervisory Board and nominate the remaining members of the Supervisory Board. Two third of the members of the Supervisory Board are appointed by the general meeting of shareholders from a list of nominees drawn up by the Stichting. The members of the Management Board are also appointed by the general meeting of shareholders from a list of nominees drawn up by the Stichting. A Supervisory Director appointed by the Stichting may be suspended or removed by the Stichting at any time and the Supervisory Director appointed by the general shareholders' meeting may be suspended or removed at any time by a majority vote of the general meeting of shareholders. However, any suspension or removal not proposed by the Stichting may only be adopted by the general meeting of shareholders by the affirmative vote of at least two-thirds of the votes cast. A resolution of the general meeting of shareholders to amend the Company's articles of association can only be adopted upon a proposal of the Management Board, after approval of the Supervisory Board, and requires a special majority (two-thirds majority vote), provided that a resolution to amend the articles of association with respect to article 4 shall only require an affirmative vote of an absolute majority of the votes cast.

i) Power of Members of the Management Board, in particular to issue or buy back shares:

As a two-tier public limited company organised under the laws of The Netherlands, the Company's business is carried out primarily by a Management Board and by executive officers appointed by the Company's Management Board.

The Company's Management Board is overseen by a Supervisory Board consisting of at least three members, which also oversees the more general course of the Company's business. The Company's Supervisory Board may agree, with the approval of the Management Board, that specific Management Board resolutions are subject to the Supervisory Board's approval. No

resolutions are specified in the Company's articles of association that require Supervisory Board approval or have been otherwise agreed.

On April 25, 2013, the Management Board was granted the authority by the Company's general shareholder's meeting (i) to repurchase shares representing up to 50% of the Company's issued share capital during a period of 18 months (until October 25, 2014) and (ii) to issue shares and/or grant rights to subscribe for shares as well as to limit or exclude the right of pre-emption in relation to such shares being used or rights being granted (until April 25, 2018), up to a maximum of shares/rights as the authorised capital permits.

j) Significant agreements to which the Company is a party and which alter or terminate upon a change of control of the Company:

In September 2011, one of the Company´s subsidiaries entered into an asset backed revolving credit agreement with an US-bank providing a maximum of USD 40.0 million dependent on the level, and secured by, eligible US inventories and receivables. The original agreement covered five years. In the third quarter of 2013, this credit agreement was extended until August 2018. In the event of a) borrower's parent company ceasing to own at least 100% of the outstanding voting equity interests of the borrower or (b) Company ceasing to own, directly or indirectly, at least 100% of the outstanding voting equity interests of borrower's parent company or (c) the occupation of a majority of the seats on the board of directors of the borrower by persons who were neither (i) nominated by the board of directors of the borrower nor (ii) appointed by directors so nominated; or (d) the occupation of a majority of the seats on the board of directors of the borrower's parent company by persons who were neither (i) nominated or elected by the board of directors of borrowers parent company nor (ii) appointed by directors so nominated or elected, then, at the request of the lenders, the following actions may take place: (i) termination of the commitments, and (ii) declaration of the principal of the loans then outstanding together with accrued interest thereon and all fees and obligations of the borrower accrued to be due and payable in whole or in part.

In July 2012, certain Austrian subsidiaries of the Company entered into a loan agreement with an Austrian Bank providing a maximum of €15.0 million (from July 1 until December 31) and of €3.0 million (from January 1 until June 30). This agreement expires on December 31, 2014 and requires the Company to achieve certain yearly financial covenants. The loan is secured by certain Austrian trade receivables as well as by the inventories of certain Austrian subsidiaries in various warehouses. In addition, Mr. Johan Eliasch, the Company´s CEO, granted a personal non-performance guarantee ("Ausfallsbürgschaft") up to a maximum amount of €5.0 million to ensure the fulfillment of the obligations of the subsidiaries of the Company under the loan. In the third quarter of 2013, this loan agreement was renegotiated. It was agreed to reduce the maximum amount available from July 1 until December 31 from €15.0 million to €10.0 million and to increase the personal non-performance guarantee of Mr. Johan Eliasch from a maximum amount of €5.0 million to a maximum amount of €10.0 million. At December 31, 2012 and 2013 the Company did not use this credit line. In the event of Mr. Johan Eliasch holding directly or indirectly less than 50% of the shares or voting rights of these Austrian subsidiaries of the Company and/or no longer being able to appoint the members of the Management Board of these Austrian subsidiaries of the Company, the Austrian Bank may a) no longer fulfil payment obligations arising out of the loan agreement and b) terminate the loan agreement and declare the principal of the loan then outstanding together with accrued interest thereon and other fees accrued to be due and payable.

On September 2, 2013, Head N.V. and HTM Sport GmbH, a subsidiary of Head N.V., announced the issuance of a new €45.0 million Bond. On September 26, 2013, Head N.V. and HTM Sport GmbH announced the increase in size from €45.0 million to €60.0 million based on additional investor demand. The Bond was issued in Switzerland by HTM Sport GmbH and guaranteed by Head N.V. The securities are Euro denominated, carry a fixed coupon of 5.25% payable annually in arrears in September, and have a term of 5 years with maturity on September 26, 2018. The Bond is listed on the SIX Swiss Exchange (SIX). Under the Bond Purchase Agreement that was concluded with a Swiss Bank, the issuer will at the option of a Bond holder, redeem such Bond at par together with interest accrued upon a Change of Control with regard to the Company. A Change of Control occurs when: (a) an offer to acquire shares, whether expressed as a public takeover offer, a merger or similar scheme with regard to such acquisition, or in any other way, is made in circumstances where (i) such offer is available to (aa) all holders of shares, (bb) all holders of shares other than the offeror and any persons acting in concert with such offeror or (cc) all holders of shares other than persons who are excluded from the offer by reason of being connected with one or more specific jurisdictions, and (ii) such offer having become or been declared unconditional in all respects, the Company becomes aware that the right to cast more than 50% of all the voting rights (whether exercisable or not) of the Company has become unconditionally vested in the offeror and any persons acting in concert with the offeror; provided that such an offer shall not result in a Change of Control, if the offeror and any persons acting in concert with the offeror together already hold more than 50% of all the voting rights in the Company before that offer was made; or (b) the Company consolidates with or merges into any other company; or (c) the legal or beneficial ownership of all or substantially all of the assets owned by the Company, either directly or indirectly, are acquired by one or more other persons.

k) Agreements between the Company and its board members or employees providing for compensation if they resign or are made redundant without valid reason or if their employment ceases because of a take over bid:

There are no agreements between Head N.V. and its board members or other employees providing for compensation in case of resignation or redundancy without valid reason in consequence of a take over bid.

HEAD'S Corporate Governance Rules – Dutch/Austrian Corporate Governance Code – Explanations

Head's general corporate governance framework and its development

As a Dutch company listed on the Vienna Stock Exchange and until March 2008 on the New York Stock Exchange (NYSE) and registered with the U.S. Securities and Exchange Commission (SEC) until June 2009, the Company has had to consider different corporate governance systems established by the Dutch, Austrian and U.S. jurisdictions respectively.

With regard to The Netherlands, on December 9, 2003 a corporate governance code (the Dutch Corporate Governance Code) was presented which became effective for all Dutch listed companies for the financial year beginning on or after January 1, 2004. This Code was amended with an effective date of January 1, 2009 to bring it in line with corporate governance developments and to reflect the changes in Dutch and EU legislation, inter alia in connection with the implementation of the European Transparency Directive.

In Austria, a self-regulatory Code of Corporate Governance was drafted in October 2002 and provides corporations with a framework for the management and control of enterprises. This Austrian Code of Corporate Governance recommended that Austrian stock listed companies adhere to such Code or parts of it. The Austrian Code was amended on several occasions and the newest amendment became effective as of July 2012 to take into account national and international developments with regard to the diversity rule and the inclusion of new rules to improve cooperation between the Supervisory Board and the external auditor.

Since Head N.V. is a Dutch company, not listed in The Netherlands but listed on the Vienna Stock Exchange and, until 2008, listed on the NYSE, it seemed appropriate to focus on rules developed by the respective exchanges. At the Company's annual general meeting in 2004, Head N.V. asked its shareholders to approve that Head N.V. apply the NYSE and SEC rules of corporate governance and not specifically the rules of the Dutch Corporate Governance Code since Head N.V. had a considerable U.S. shareholder base. The shareholders of Head N.V. approved that proposal, pursuant to which, until 2008, the Company focused on rules of corporate governance established by the NYSE and the SEC.

Since March 2008, the Company is no longer listed on the NYSE, and since June 2009 is no longer registered with the SEC. The Company, however, continues to be listed on the Vienna Stock Exchange and continues to have particularly strong connections to Austria. In particular, a number of the Company's most important subsidiaries with many employees are incorporated in Austria, some of the Company's production sites and key officers are based in Austria, and finally, one of the Company's Austrian subsidiaries, HTM Sport GmbH, issued bonds which have been listed on European stock exchanges. It therefore seemed appropriate to focus specifically on the Austrian rules regarding corporate governance.

In addition, since shareholders made their investment knowing that the Company is listed on the Vienna Stock Exchange, the Company believes they expect the Company to comply with all the applicable capital market related rules and recommendations of that particular Stock Exchange. Therefore, in order to avoid the application of different sets of rules within the Group and to ensure that those corporate governance standards are being followed which have been developed for the Vienna Stock Exchange, at the annual general meeting in 2008 the shareholders of the Company were asked to approve the application of the Austrian Code of

Corporate Governance. Head N.V.'s shareholders approved such proposal and the Company therefore primarily follows the Austrian Code of Corporate Governance since June 2008, which was updated to reflect advancements in corporate governance practice in Europe as of July 2012. A copy of the Austrian Code of Corporate Governance valid as of July 2012 is available on the Company's website (www.head.com).

The Austrian Corporate Governance Code

According to the Austrian Code of Corporate Governance, a company needs to declare once a year that the Code's Rules and recommendations have been and are being complied with or which of the Code's recommendations have not been and are not being applied.

Certain of the rules mentioned in the Austrian Code of Corporate Governance, the so called "**L**" rules, refer to legal requirements under either the Austrian Stock Exchange or Capital Markets Act or to the Austrian Stock Corporation Act. Insofar as the Code refers to the Austrian Stock Corporation Act, the Company will explain the applicable rules for the Company under the Dutch Civil Code, if they are different than what is described under Austrian law.

Based on these reservations the Company has decided to comply with the Rules of the Austrian Code with the following exceptions.

Rule 3 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): Acceptance or rejection of takeover bids shall be decided solely by the shareholders. The management board and the supervisory board are required to present a balanced analysis of the opportunities and risks of an offer to the persons addressed by the takeover bid.

The price of a mandatory bid or of a voluntary bid with the purpose of attaining a controlling interest pursuant to the Takeover Act shall not be below the highest monetary consideration paid or agreed-upon by the offeror or a party acting in concert with the offeror within the past twelve months prior to the announcement of the bid for the shares of the target company. Furthermore, the price must correspond at least to the average market price weighted by the respective trading volumes for the shares over the past six months prior to the day of the announcement of the intention to make a bid.

The first paragraph applies under Dutch law as well, but only in respect of a mandatory bid (article 5.80a of the Dutch Financial Supervision Act (*Wet FinancieelToezicht*)), and not in respect of a voluntary bid. The second paragraph does not exist under Dutch law.

Rule 4 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): A general meeting must be convened at the latest on the 28th day before the ordinary general meeting, otherwise by the latest on the 21st day before the general meeting by an official announcement unless the by-laws prescribe other longer deadlines. The announcement convening the general meeting and the information stipulated by the Companies Act must be made available on the company's website as of the 21st day prior to the general meeting.

Under Dutch law the deadlines to convene a general meeting are longer. The requirements to convene a general shareholder's meeting are therefore as follows: Notice of shareholders' meetings is given on our website (www.head.com) and by advertisement in a Dutch national newspaper and an Austrian national newspaper. The notice includes the requirements for

admission to the meeting. Such notice is to be given not later than the forty-second day prior to the day of the meeting and is to state the place and time of the general meeting, the subjects to be considered, the procedure for participating by written proxy, the procedure for participating and exercising voting rights by electronic means, the website address of the Company, the applicable record date and, if relevant, that documents containing the subjects to be considered may be inspected at the Company's offices.

Rule 5 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): The candidates for the supervisory board elections including all declarations according to the Companies Act must be disclosed by the company at the latest on the 5th workday prior to the general meeting on the website of the company; otherwise the persons concerned shall not be included in the elections.

According to our Articles of Association and in accordance with Dutch law, one third of our Supervisory Directors will be appointed by the Stichting and will therefore not be elected by the general meeting. The other Supervisory Directors will be appointed by the general meeting from a list of nominees, to be drawn up by the Stichting. The details about the Supervisory Board candidates to be elected by the general meeting are to be disclosed in the explanatory notes to the agenda for the respective general meeting of shareholders. The explanatory notes to the agenda form part of the Notice and Convocation of a General Meeting that needs to be disclosed on the Company's website 42 days prior to the day of the General Meeting.

Rule 6 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): The resolutions passed at the general meeting and the information required by the Companies Act shall be disclosed on the company's website at the latest on the 2nd workday after the general meeting.

Under Dutch law, there is no such requirement, but the Company has disclosed in the past the resolutions passed at the General Meeting as soon as they were available after the General Meeting.

Rule 8 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): The general meeting has the right to authorize the management board for a period not exceeding thirty months to buy back the company's own shares up to a maximum of 10% of the share capital in those cases permitted by law. The resolution and authorization for the buyback are to be published immediately before execution. The resolution and immediately before implementation the execution of this buyback authorization shall be disclosed.

According to Head N.V.'s Articles of Association, the Company shall be entitled to acquire fully paid-up shares in its own capital or depository receipts in respect thereof, provided either the no valuable consideration is given or provided that a) the distributable part of the net assets is at least equal to the purchase price and b) the nominal value of the shares or the depository receipts in respect thereof which the Company acquires, holds or holds in pledge or which are held by a subsidiary does not exceed half of the issued capital. The Management Board shall require the authorisation of the general meeting for an acquisition for valuable consideration. This authorisation may be given for a maximum of 18 months. At the time of granting such authorisation, the general meeting must determine how many shares or depository receipts thereof may be acquired and between which limits the price must be (see also Note 12).

Rule 24 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): All transactions between the company or a group company and the members of the management board or any persons or companies with whom the management board members have a close relationship must be in line with common business practice. The transactions and their conditions must be approved in advance by the supervisory board with the exception of routine daily business transactions.

With regard to Rule 24 the following can be noted: The Company complies with Dutch law by having provided in the Company's articles of association that in the event of a conflict of interest between the Company and a member of the management board, the Company shall be represented by a member of the management board or a member of the supervisory board, such person to be designated for this purpose by the supervisory board and the management board jointly. The member concerned shall be an independent/disinterested member.

Rule 27: When concluding management board contracts, the following principles shall be observed: The remuneration of the management board shall be oriented on the management board member's scope of work, responsibility and personal performance as well as on the attainment of the corporate goals, the size and the economic situation of the company. The remuneration contains fixed and variable components. The variable remuneration components shall be linked, above all, to sustainable, long-term and multi-year performance criteria, shall also include non-financial criteria and shall not entice persons to take unreasonable risks. For the variable remuneration components, measurable performance criteria shall be fixed in advance as well as maximum limits for amounts or as percentage of the fixed remuneration components. Precautions shall be taken to ensure that the company can reclaim variable remuneration components if it becomes clear that these were paid out only on the basis of obviously false data.

Rule 28: If a stock option programme or a programme for the preferential transfer of stocks is proposed for management board members, then such programmes shall be linked to measurable, long-term and sustainable criteria. It shall not be possible to change the criteria afterwards. For the duration of such programmes, but at the latest until the end of the management board member's function on the management board, the management board member shall hold an appropriate volume of shares in the own company. In the case of a stock option programme, a waiting period of at least three years must be fixed. A waiting and/or holding period of a total of at least three years shall be defined in stock transfer programmes. The general meeting shall pass any resolutions and/or changes to stock option schemes and stock transfer programmes for management board members.

Rule 29: The number and distribution of the options granted, the exercise prices and the respective estimated values at the time they are issued and upon exercise shall be reported in the annual report. The total remuneration of the management board for a business year must be reported in the notes to the financial statements.

Rule 30: In addition to the information required by law (L-Rule 29), the Corporate Governance Report shall contain the following information:

• The principles applied by the company for granting the management board variable remuneration, especially to which performance criteria the variable remuneration components are linked pursuant to C-Rule 27; the methods according to which the fulfilment of the performance criteria is determined; the maximum limits determined for the variable

remuneration; the shares held in the own company and periods planned pursuant to C-Rule 28; moreover, any major changes versus the previous year must also be reported.

• The ratio of the fixed components to the variable components of the total compensation of the management board.

• The principles of the company retirement plan for the management board and the conditions.

• The principles applicable to eligibility and claims of the management board of the company in the event of termination of the function.

• The existence of a D&O insurance, if the costs are borne by the company.

Rule 31: The fixed and variable performance-linked annual remunerations of each individual management board member are to be disclosed in the Corporate Governance Report for each financial year. This shall also apply if the remuneration is paid through a management company.

Rule 43: The supervisory board shall set up a remuneration committee and the chairperson of this committee shall always be the chairperson of the supervisory board. Where supervisory boards have not more than six members (including employees' representatives) this function may be assumed jointly by all members. The remuneration committee shall deal with the contents of employment contracts with management board members, it shall ensure the implementation of the C-Rules 27, 27a and 28, and shall regularly review the remuneration policy applicable to management board members. At least one member of the remuneration committee shall be required to have knowledge and experience in the area of remuneration policy. If the remuneration committee uses the services of a consultant, it must be ensured that said consultant does not at the same time provide services to the management board in matters relating to remuneration. In the case of supervisory boards that do not have more than six members (including employees' representatives), this function may be assumed jointly by all members. The remuneration committee may be identical with the nomination committee. The chairperson of supervisory board shall inform the general meeting once a year of the principles of the remuneration system.

Rule 27 to 31 and Rule 43: Whilst the Company adheres to the above mentioned Rules on remuneration in general, due to the small size of the Company and limited number of management personnel the Company does not follow all of Rules, in particular it does not follow the variable or stock option component laid down in these Rules. The details of the Company's remuneration policy are set out under the Remuneration Policy as disclosed in the Corporate Governance Report (see also Note 9 of the Company accounts).

Rule 33 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): The supervisory board appoints the members of the management board and has the right to terminate their employment.

Under Dutch law the members of the management board are appointed by the general meeting. It is however possible to have the board members be appointed by the general meeting by nomination of a different party if included in the articles of association (article

2:133 of the Dutch Civil Code). This was done for Head N.V. (article 16 of the articles of association as posted on our website). The same applies for the termination of their position.

Rule 35 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): In accordance with the Austrian Stock Corporation Act, the supervisory board shall formulate in concrete terms a list of business transactions that are subject to its approval, and depending on the size of the enterprise, shall define the appropriate limits on amounts; this shall also apply to any major transactions concluded by subsidiaries that are of relevance to the group.

Under Dutch law there is no legal requirement for a list of transactions that require prior approval by the supervisory board. There is a similar rule for the general meeting (article 2:107a of the Dutch Civil Code). According to article 21 paragraph 1 of the articles of association of Head N.V., the supervisory board can subject resolutions made by the management board to its approval, but this is a more general stipulation than in the Austrian Code.

Rule 36: The statutory provisions according to which the supervisory board must meet at least once every three months shall be understood as a minimum requirement. Additional meetings must be held as required. If necessary, the items on the agenda may be discussed and decided by the supervisory board and its committees without the participation of the management board members. The number of meetings of the supervisory board must be reported in the Corporate Governance Report. The supervisory board shall discuss the efficiency of its activities annually, in particular, its organisation and work procedures (self-evaluation).

There is no statutory requirement under Dutch law which sets out a certain minimum amount of meetings to be held during a year. In 2013, we had two Supervisory Board meetings and six audit committee meetings. Given the small size of the Supervisory Board and the Management Board, the Boards have agreed that meetings can also be held by phone or video conference, which is in line with Dutch law.

Rule 38: The supervisory board shall define a profile for the management board members that takes into account the enterprise's business focus and its situation, and shall use this profile to appoint the management board members in line with a predefined appointment procedure. The supervisory board shall take care that no member of the management board has been convicted by law for a criminal act that would compromise the professional reliability as a management board member. Furthermore, the supervisory board shall also give due attention to the issue of successor planning.

The appointment and succession policy with regard to our management board are laid down in our Articles of Association and our Corporate Governance Guidelines posted on our website. Head N.V. has not foreseen an age limit for our management board.

Rule 39: The supervisory board shall set up expert committees from among its members depending on the specific circumstances of the enterprise and the number of supervisory board members. These committees shall serve to improve the efficiency of the work of the supervisory board and shall deal with complex issues. However, the supervisory board may discuss the issues of the committees with the entire supervisory board at its discretion. Each chairperson of a committee shall report periodically to the supervisory board on the work of

the committee. The supervisory board shall ensure that a committee has the authorisation to take decisions in urgent cases. The majority of the committee members shall meet the criteria for independence of the C-Rule 53. The Corporate Governance Report shall state the names of the committee members and the name of the chairperson. The Corporate Governance Report must disclose the number of meetings of the committees and discuss the activities of the committees.

Other than an audit committee, there is no other committee currently installed at the company. Given the small size of the supervisory board, all issues are dealt with by the entire board and the installation of separate committees for different issues would not increase efficiency.

Rule 40 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): Irrespective of the size of the supervisory board, it shall set up an audit committee in the case of exchange-listed companies. The audit committee shall be responsible for monitoring the preparations for the accounting procedures; for monitoring the work of the auditor; for the audit and preparation of the confirmation of the financial statements, of the proposal for the distribution of the profit, and of the report of the management board. The audit committee shall also monitor the group accounting procedures, audit any consolidated financial statements and prepare a proposal for the selection of an auditor for the financial statements and shall report on this to the supervisory board. Furthermore, the audit committee shall monitor the effectiveness of the company-wide internal control system, if given, of the internal audit system and of the risk management system of the company. At least one person with special knowledge meeting the company's requirements and practical experience in the area of finance and accounting and reporting must belong to the audit committee (financial expert). The chairperson of the audit committee or financial expert may not be a person who in the past three years has served as a member of the management board or as management-level staff or auditor of the company or has signed an auditor's opinion or for any other reason is not independent and free of prejudice.

It is not a legal requirement under Dutch law to nominate a financial expert that forms part of the Audit Committee. However, the Supervisory Board considers that the Audit Committee members as a group possess adequate skills and expertise to fulfil the tasks entrusted to the Audit Committee.

Rule 59 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): The co-determination rights of employees' representatives on the supervisory board form part of the statutory Austrian system of corporate governance in addition to the co-determination rights at the operational level in the form of works councils. The employees' representatives are entitled to appoint to the supervisory board of a stock corporation one member from among their ranks for every two members appointed by the general meeting (but not external members from the trade union). (Statutory one-third parity rule). If the number of shareholder representatives is an odd number, then one more member is appointed as an employee representative. The one-third parity representation rule also applies to all committees of the supervisory board, except for meetings and votes relating to the relationship between the company and the management board members with the exception of resolutions on the appointment or revocation of an appointment of a member of the management board and on the granting of options on stocks of the company. Employees' representatives shall exercise their functions on an honorary basis and their appointment may be terminated at any time only by the works council (central works council). The rights and

obligations of employees' representatives shall be the same as those of shareholders' representatives; this shall apply, in particular, to the right to receive information and to monitoring rights, to the obligation to act with due diligence and to maintain secrecy and to their liability for failure to comply. In the event of personal conflicts of interest, employees' representatives shall abstain from voting, the same being applicable to shareholders' representatives.

Under Dutch law, there is no such stipulation for entities like Head N.V.

Rule 63 (an "L" rule" which therefore refers to Austrian law applicable to Austrian companies): The company shall disclose – as soon as it gains knowledge thereof – any changes in the shareholder structure, if, as a consequence of the acquisition or disposal of shares in the company, the percentage of shares representing voting rights held by a shareholder reaches, exceeds or falls below the thresholds of 5 percent, 10 percent, 15 percent, 20 percent, 25 percent, 30 percent, 35 percent, 40 percent, 45 percent, 50 percent, 75 percent or 90 percent.

Under Dutch law it is the obligation of the shareholder - and not the company - to disclose certain percentages to the AFM. The percentages are slightly different from the Austrian Code (5, 10, 15, 20, 25, 30, 40, 50, 60, 75 or 95 percent) (article 5.38 of the Dutch Financial Supervision Act).

Rule 68: The company shall publish annual financial reports, half-yearly financial reports and any other interim reports in English and German language, and shall make these available on the company's website. If the annual financial report contains consolidated financial statements, the financial statements prepared under business law contained in the annual report need to be published and made available only in German language.

In accordance with the Austrian Stock Exchange rules, the Company, as a foreign issuer, is only obliged to submit the quarterly results in English.

Rule 73: The management board shall immediately post any director's Dealing (Article 48d par. 4 Stock Exchange Act) reported on the company's website and shall keep such information on the website for at least three months. The announcement can also be done by making a reference to the corresponding website of the Financial Market Authority.

§ 48d) Abs 4 of the Austrian Stock Exchange Act is only applicable for issuers that are incorporated in Austria. However, the same requirement exists under Dutch law, too, but the reporting obligation is not towards the Austrian Financial Market Authority, but according to section 5:48 of the Dutch Financial Supervision Act managing directors and supervisory directors of listed companies must inform the AFM (Dutch Financial Authority) regarding their shareholding and regarding rights under which they can increase their shareholding (call options, rights to subscribe for shares, warrants etcetera) and any changes therein.

The Dutch Corporate Governance Code

General:

Notwithstanding the above, however, the Company also takes into account the provisions of the Dutch Corporate Governance Code. Although compliance with the Austrian Code of Corporate Governance implies certain deviations from the Dutch Corporate Governance Code, according to the Dutch Corporate Governance Code, departures may be justified in certain circumstances, in particular if supported by the shareholders' approval as is the case for Head N.V. In addition, similar to the Dutch Corporate Governance Code, also the Austrian Code of Corporate Governance provides for rules to be followed with regard to at least the following topics:

Rules on the composition and duties of the management board, Rules on the Remuneration of the management board, Rules on the Issuance of Stock Option Plans, Rules on Conflict of Interests for management and supervisory board, Rules on the composition and duties of the supervisory board, Rules on the Composition and Duties of the Shareholder Meetings, Rules on Financial Reporting requirements, Rules on Transparency and Auditing, Rules on the Duties of the External Auditor, Rules on Investor Relations and Rules on the Interaction between the supervisory board and the management board.

The differences between the Dutch Corporate Governance Code on the one hand and the Austrian Code of Corporate Governance on the other hand are therefore not as substantial. This is even more true since both Codes have been recently amended to reflect the changes resulting from the European Transparency Directive applicable to all European countries.

In this regard the Dutch Corporate Governance Code Monitoring Committee declared that the existing "comply or explain" rule provides sufficient scope for the Dutch companies listed abroad to comply with the Dutch Code by applying a foreign corporate governance code.
The Company has additionally decided to provide explanations in a general form with regard to deviations by the Company from the Dutch Corporate Governance as follows:

Principles and best practice provisions:

II.1 The Management Board

The Company's articles of association provide for a Management Board that is responsible for managing the Company under the general supervision of the Supervisory Board. The Management Board is responsible for complying with all legislations, managing the risks associated with the Company's activities and for financing the Company.

The members of the Management Board are appointed by the general meeting. Each member of the Management Board may also be suspended or removed at any time at a general meeting by an affirmative vote of two thirds of the votes cast.

It is not in line with the Company's corporate culture and core values nor is it always in the commercial interests of the Company to limit the length of the contract of the members of the Management Board to four years. The current members of the Management Board have therefore been appointed for an indefinite period of time. Some members of the Management Board have come from the Company's own ranks or have already been with the Company for a

longer period of time under other employment terms. In these cases, it does not seem to be appropriate to limit the appointment to a four years period. The general meeting should have the flexibility to decide on a case by case basis the length of term for particular members of the Management Board as they deem it appropriate.

According to the Company's articles of association, the Supervisory Board may agree, with the approval of the Management Board that specific Management Board resolutions are made subject to the Supervisory Board's approval. No resolutions are specified in the Company's articles of association that require Supervisory Board approval, nor have any such resolutions been otherwise agreed between the Supervisory Board and the Management Board of the Company.

II.2 Remuneration

Whilst the Company adheres to the principles of the Dutch Corporate Governance Code on remuneration, due to the small size of the Company and limited number of management personnel the Company does not follow all of the best practice provisions. The details of the Company's remuneration policy are set out under the Remuneration Policy as disclosed in the Corporate Governance Report.

II.3 Conflicts of interest

Mr. Johan Eliasch, who acts as a managing director, is not an independent director given that he, together with his family members, has a beneficial interest in Head Sports Holdings N.V., which indirectly controls Head N.V. All related party transactions between Head N.V. and Mr. Eliasch and/or entities controlled by him and his family members are set out in the section headed Related Party Transactions (see Note 22).

Other than this, there are no potential conflicts of interest between the duties of the members of the Supervisory Board, the members of the Management Board and the executive officers of Head N.V. and their private interests or other duties.

In addition, the Company's articles of association state that in the event of a conflict of interest between Head N.V. and a member of the Management Board, the company shall be represented by such member of the Management Board or of the Supervisory Board as the Management Board and the Supervisory Board jointly designate for this purpose, which shall be an independent/disinterested member.

III. Supervisory Board

The Supervisory Board does not formally draw up a profile as recommended in the best practice provisions. Due to the size and low complexity of the Company, the size of the Supervisory Board and the close connection between the Supervisory Board and the Management Board this is not deemed necessary.

There is no formal induction program. However, the members of the Supervisory Board are presented to by the Management Board and have access to any information they require and can tour any facility within the Company on request. Key executive officers are available at meetings to discuss any specific functions of the business with the members of the Supervisory Board.

The Supervisory Board does not have direct contact with the works council. Any issues will be brought to the attention of the Supervisory Board by the Management Board.

Both the Supervisory Board and Management Board of the Company are small and have remained broadly unchanged for many years. The rules governing the appointment and replacement of Board Members are set out in the Company's articles of association and are also summarized in the Supervisory Board report.

IV. The Shareholders and the General Meeting of Shareholders

Preference shares may be issued as a preventive measure against unfriendly takeover bids. The minimum amount required to be paid on the preference shares upon issuance is 25% of the nominal amount issued. In the event of a hostile takeover bid, preference shares may be issued to a legal entity charged with caring for the Company's interests and preventing influences that may threaten the Company's continuity, independence or identity. Holders of preference shares do not share in the Company's reserves and such shares are not listed. The preference shares will be registered shares and share certificates will not be issued. Preference shares can be issued in the same way as ordinary shares, but carry no preemptive rights. Preference shares and ordinary shares have equal voting rights at a general meeting of shareholders. Holders of preference shares will be paid a cumulative annual dividend calculated on the basis of the deposit interest rate of the European Central Bank to the paid up part of their nominal value. To the extent there are distributable profits, the preferential dividend shall be paid first. An allocation of profits to the reserves or the payment of a dividend to holders of ordinary shares may only be effected from the remaining distributable profits.
Authorised but unissued preference shares may be issued by the Management Board, which is also authorised to grant rights to subscribe for such preference shares. Unless extended by the amendment of the Company's articles of association or by resolution of the shareholders for a period of five years in each instance, these authorisations will end on April 25, 2018, five years after the date of the last annual general meeting of Head N.V. when the authority of the Management Board was extended by resolution of the shareholders.

The Company has not formulated or published a policy on bilateral contracts with shareholders. Due to the small size of the Company, the Company does not deem this necessary.

The Company is deemed to comply with the Dutch Corporate Governance Code.

Gender Diversity

The Company currently has no female members of either the Supervisory Board or the Management Board. Achieving gender diversity is more difficult in certain sectors and, as a sports manufacturing company, the demographic profile of the talent pool can present challenges. However, we will work towards extending the female composition of our Board as vacancies arise and suitable candidates are identified, with an aspiration of 30% female membership by 2016.

Functioning of the General Meeting of Shareholders

The main powers of the general meeting of shareholders of Head N.V. relate to:

- appointment, suspension and dismissal of members of the Management Board and Supervisory Board;
- adoption of the annual accounts;
- release of liability of the members of the Management Board and Supervisory Board;
- extension of the authorization of the Management Board to issue shares or grant rights to subscribe for shares, to restrict or exclude pre-emption rights of shareholders and the authorization of the Management Board to repurchase own shares;
- cancellation of shares;
- amendment of the Company's articles of association;
- approval of decisions of the Management Board that would entail a significant change in the identity or character of the Company or its business;
- determination of the remuneration of the members of the Supervisory Board;
- approval of stock option plans.

Each shareholder is entitled to attend shareholders' meetings of the Company, address the meeting and to exercise his voting rights either directly or through a proxy. All details of how the shareholder can attend, address and vote at the meeting are included in the convocation. Each share confers the right to cast one vote.

Except where the law or the Articles of Association of the Company otherwise require, all resolutions are adopted by an absolute majority of the votes cast regardless of the percentage of the Company's issued share capital present or represented at the meeting.

The Management Board of the Company may determine that the right to attend shareholders' meetings may also be exercised by electronic means of communication. As a minimum requirement, the person entitled to attend the meeting via electronic means of communication must be identifiable, he must be able to directly take note of the proceedings of the meeting and, if entitled, to exercise his voting rights. The Management Board may set as additional requirement that persons entitled to attend the meeting can also participate in the deliberation by electronic means of communications. The Management Board may set further conditions to the use of electronic means of communication. Those conditions shall be disclosed with the notice of the meeting.

Supervisory Board Report

The Supervisory Board is responsible for overseeing the Company's Management Board and the general course of affairs of the Company's business. The Company's Supervisory Board may agree, with the approval of the Management Board, that specific Management Board resolutions be subject to the Supervisory Board's approval. No resolutions are specified in the Company's articles of association that require Supervisory Board approval.

The Supervisory Board had three members as of December 31, 2013, whose names and details are set forth below.

Name	Age	Nationality	Title
Mr. Jürgen Hintz	71	U.S.	Chairman of the Supervisory Board
Mr. Viktor Klima	66	Austria	Member of the Supervisory Board
Mr. Franz Klammer	60	Austria	Member of the Supervisory Board

Mr. Jürgen Hintz has been a Member of the Supervisory Board of Head N.V. since May 2003 and was reappointed at the shareholders' meeting in May 2012 for another four years. In December 2004, Mr. Hintz retired as Group Chief Executive Officer of Novar plc, an international group with core activities in Intelligent Building Systems, Aluminum Extrusion Solutions, and Security Printing Services with an annual turnover of £1.5 billion. Prior to this, he was President and Chief Executive of Carnaud/Metalbox until October 1995, Executive Vice-President and member of the main Board of Procter & Gamble Company and non-Executive Director of Inchcape plc and Apple Computers Inc.

Mr. Viktor Klima has been a member of the Supervisory Board of Head N.V. since October 2000 and was reappointed at the shareholders' meeting in May 2012 for another four years. He served as Chancellor of the Republic of Austria from January 1997 until his resignation February 2000. In this capacity, Mr. Klima held the Presidency of the European Union in the second half of 1998. Prior to serving as Chancellor, he served as Minister of Finance 1996-97 and Minister of Public Economy and Transport 1992-96. Prior to his political career, he was a member of the management board of the OMV oil company, responsible for finance, capital markets and acquisitions. Prior to this position, he held various management positions within OMV. Mr. Klima took up a senior management position with Volkswagen in October 2000.

Mr. Franz Klammer was appointed as a member of the Supervisory Board of Head N.V. in September 2011. Mr. Franz Klammer ranks as one of the best downhill skiers of all time, overwhelmingly dominating the downhill event for four consecutive World Cup seasons winning 25 World Cup downhill events and a gold medal at the 1976 Winter Olympics. Mr. Klammer was Sportsman of the Year in Austria three times. After retiring from skiing, Mr. Klammer took up tour car racing and in 1990 won the prestigious European Tour Car Championship. Mr. Klammer has established the Franz Klammer foundation to help seriously injured athletes, is ambassador for the United Nations and has chaired the 2014 Salzburg bid for the Winter Olympics. In 2001, one of the Company´s subsidiaries and the Franz Klammer GmbH entered into an agency agreement committing Mr. Franz Klammer to use and promote some of the Company´s products.

HEAD N.V. AND SUBSIDIARIES
SUPERVISORY BOARD REPORT

All members of the Supervisory Board are "independent" pursuant to the best practice provision of the Austrian and Dutch Corporate Governance Code. None of the Supervisory Board members are employees of the Company, have received any material direct compensation or have any other material relationship with the Company, except as explained in Note 22. The members of the Supervisory Board perform their duties without a mandate and independently of the subsidiary interests connected with the Company.

In 2013, the Supervisory Board performed all duties assigned to it by law and by the Company's Articles of Association. During the year, two face to face meetings were held with the Management Board. The main topics of discussion were strategy, targets, financing, risk management and annual budgeting. In addition, the Management Board regularly informed the Supervisory Board about the course of business and the financial situation of the Company and involved the Supervisory Board in 2013 in specific discussions on the new Bond and the two acquisitions (see Note 31). None of the members of the Supervisory Board were frequently absent from meetings.

Audit Committee

In 2013, the Audit Committee, which comprises of Mr. Hintz and Mr. Klima held meetings six times in carrying out the audit committee activities. All meetings were attended by the CFO. The Audit Committee discussed quarterly and full year results. Two meetings were attended by the external auditor during which time the Audit Committee also met with the external auditor without the Company´s management being present. The Audit Committee discussed with the Company's external auditor 2012 annual results. The audit plan 2013 was discussed with the external auditor and the audit fee has been approved. The Audit Committee also reviewed press releases and quarterly reports as well as management's assessment of internal control over financial reporting. On a yearly basis, the Audit Committee evaluates its performance and reviews and assesses the adequacy of the Audit Committee charter.

On March 6, 2014, the Audit Committee discussed with the Company´s external auditor 2013 annual results and also met with the external auditor without the Company´s management being present.

It was concluded that due to the small size of the Company, the low complexity of the business and the established internal control structure no internal auditor is required.

Remuneration Policy

Any remuneration paid to the Supervisory Board is determined by the general meeting of shareholders.

Remuneration and further conditions of employment for members of the Management Board are determined by the Supervisory Board in consultation with the Chairman of the Management Board. Remuneration can comprise of a fixed contribution and a variable element. The variable element, when used, is based on the profitability of the Company as reported in its audited financial statements and is based on targets that are set individually with each member of the Management Board. Any grants of options to members of the Management Board will be submitted to the Supervisory Board for their

approval. For detailed information on remuneration and stock options see Note 6 of the Company accounts.

The Supervisory Board conducts an annual self-evaluation to determine whether it and the Management Board are functioning effectively.

HEAD N.V. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – General information

Head N.V. ("Head" or the "Company") was incorporated in Rotterdam, The Netherlands, on August 24, 1998. The address of its registered office is Prins Bernhardplein 200, 1097 JB Amsterdam, The Netherlands. The Company's ordinary shares are listed on the Vienna Stock Exchange ("HEAD").

The Company is a leading global manufacturer and marketer of branded sporting goods serving the skiing, tennis and diving markets. The Company has created or acquired a portfolio of brands – Head (principally alpine skis, ski bindings, ski boots, snowboard and protection products, tennis, racquetball, paddle and squash racquets, tennis balls and tennis footwear, sportswear and swimming products), Penn (tennis balls and racquetball balls), Tyrolia (ski bindings), Mares (diving equipment).

Head primarily conducts business in Europe (mainly in Austria, Italy, Germany, France, Switzerland, The Netherlands, Spain, the United Kingdom and Poland), North America and Asia.

These consolidated financial statements are authorized for issuance by the Board of Directors as of March 13, 2014 and will be presented to the General Meeting of Shareholders on April 29, 2014.

All forecasts and estimates presented in this report are based on the management´s current judgement of the economic environment and the Company´s performance in that environment. The actual results may differ significantly.

Note 2 - Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of Presentation

The Company and its subsidiaries maintain their accounting records in accordance with their local regulations and have made certain adjustments to these records to present the accompanying financial statements in conformity with International Financial Reporting Standards as adopted by the European Union ("IFRS"). The consolidated financial statements have been prepared under the historical cost convention and fair value accounting for available-for-sale financial assets and derivatives.

Percentages and some amounts contained herein have been rounded for ease of presentation, and some amounts may not total due to this rounding.

New and amended standards adopted by the group

The following standards have been adopted by the Company for the first time for the financial year beginning on or after January 1, 2013 and have an impact on the Company:

Amendment to IAS 1 "Financial Statement Presentation" regarding other comprehensive income (effective July 1, 2012; endorsed by the EU in June 2012):
The main change resulting from these amendments is a requirement to group items presented in "other comprehensive income (OCI)" on the basis of whether they are potentially reclassifiable to profit or loss subsequently. The amendments do not address which items are presented in OCI.

IAS 19 "Employee benefits" (effective January 1, 2013; endorsed by the EU in June 2012):
The impact on the Company has been as follows: to eliminate the corridor approach and recognise all actuarial gains and losses in OCI as they occur, to immediately recognise all past service costs and to calculate finance costs on a net funding basis (see Note 2.1.)

IFRS 13 "Fair value measurement" (effective January 1, 2013; endorsed by the EU in December 2012):
IFRS 13 aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRSs. The requirements, which are largely aligned between IFRSs and US GAAP, do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within IFRSs.

New standards, amendments and interpretations issued but not effective for the financial year beginning January 1, 2013 and not early adopted

IFRS 9 "Financial instruments" (effective not before 2017; endorsement by the EU still to be discussed):
IFRS 9 addresses the classification, measurement and recognition of financial assets and financial liabilities. IFRS 9 is the first standard issued as part of a wider project to replace IAS 39. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. The guidance in IAS 39 on impairment of financial assets and hedge accounting continues to apply. The group is yet to assess the full impact of the amendments.

IFRS 10 "Consolidated financial statements" (effective January 1, 2014; endorsed by the EU in December 2012):
The objective of IFRS 10 is to establish principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entity to present consolidated financial statements. The new standard defines the principle of control and establishes controls as the basis for consolidation and sets out how to apply the principle of control to identify whether an investor controls an investee and therefore must consolidate the investee as well as the accounting requirements for the preparation of consolidated financial statements. IFRS 10 is not expected to have a material impact on the Company.

IFRS 11 "Joint arrangements" (effective January 1, 2014; endorsed by the EU in December 2012):
IFRS 11 is a more realistic reflection of joint arrangements by focusing on the rights and obligations of the arrangement rather than its legal form. There are two types of joint arrangement: joint operations and joint ventures. Joint operations arise where a joint operator

has rights to the assets and obligations relating to the arrangement and therefore accounts for its share of assets, liabilities, revenue and expenses. Joint ventures arise where the joint venturer has rights to the net assets of the arrangement and therefore equity accounts for its interest. Proportional consolidation of joint ventures is no longer allowed. IFRS 11 is not expected to have a material impact on the Company.

IFRS 12 "Disclosures of interests in other entities" (effective January 1, 2014; endorsed by the EU in December 2012):
IFRS 12 includes the disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and other off balance sheet vehicles. IFRS 12 is not expected to have a material impact on the Company.

Amendment to IFRSs 10, 11 and 12 on transition guidance (effective January 1, 2014; endorsed by the EU in the second quarter 2013):
These amendments provide additional transition relief to IFRSs 10, 11 and 12, limiting the requirement to provide adjusted comparative information to only the preceding comparative period. This amendment is not expected to have a material impact on the Company.

IAS 27 (revised 2011) "Separate financial statements" (effective January 1, 2014; endorsed by the EU in December 2012):
IAS 27 (revised 2011) includes the provisions on separate financial statements that are left after the control provisions of IAS 27 have been included in IFRS 10. This amendment is not expected to have a material impact on the Company.

IAS 28 (revised 2011) "Associates and joint ventures" (effective January 1, 2014; endorsed by the EU in December 2012):
IAS 28 (revised 2011) includes the requirements for associates and joint ventures that have to be equity accounted following the issue of IFRS 11. This amendment is not expected to have a material impact on the Company.

There are no other IFRSs or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the group. The Company generally applies new standards, amendments and interpretations according to the effective date in the EU.

Consolidation

a) Subsidiaries
The consolidated financial statements of Head include the financial statements of all majority-owned subsidiaries and entities over which the Company has financial and operating control and special purpose entities. Subsidiaries are fully consolidated from the date on which control is transferred to the Company. They are de-consolidated from the date that control ceases. The acquisition method of accounting is used to account for business combinations by the Company. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the Company. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Company recognises any non-controlling interest in the

acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the Company's share of the identifiable net assets acquired is recorded as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the income statement.

Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealized losses are also eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Company.

b) Joint Ventures
The group's interests in jointly controlled entities are accounted for using the equity method of accounting. The Company's share of its Joint Venture post-acquisition profit or loss is recognised in the income statement. When the Company's share of loss in a Joint Venture equals or exceeds its interest in the Joint Venture, the Company does not recognise further losses, unless it has incurred obligations or made payments on behalf of the Joint Venture.

Segment Reporting

An operating segment is consistent with the internal reporting provided to the chief operating decision-maker, the Company's Chief Executive Officer. Decisions regarding strategy, resources, financing, capital investments and insurance are made on the basis of the Company's performance based on its consolidated operating results and consolidated balance sheet; and liquidity planning is based on the Company's consolidated cash flows. Based on similar characteristics, the operating segments are aggregated into one reporting segment.

Foreign Currency Translation

a) Functional and presentation currency
Items included in the financial statements of each of the Company's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are presented in euros, which is the Company's functional and presentation currency.

b) Transactions and balances
Foreign currency transactions are translated into the functional currency using the exchange rates prevailing on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement. The effect of exchange rate changes on intercompany transactions of a long-term investment nature are recognised in other comprehensive income as a component of fair value and other reserves/CTA.

Foreign exchange gains and losses that result from financing and investing activities are presented in the income statement within "Other non-operating income/expense, net". All other

foreign exchange gains and losses are presented in the income statement within "Other operating income/expense, net".

c) Group companies
The results and financial position of all the group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet.
- Income and expenses for each income statement are translated at average exchange rates prevailing during the year.
- All resulting exchange differences are recognised in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost less accumulated depreciation and impairment losses. Additions and improvements that extend the useful lives of the plant and equipment and replacements, major renewals, and betterments are capitalized and depreciated over the remaining useful life of the asset. The cost of maintenance, repair and minor renewals are expensed as incurred. When plant and equipment is retired or otherwise disposed, the cost and related accumulated depreciation and impairment losses are removed from the related accounts, and any gain or loss on disposition is recognised in the income statement. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets. The Company's buildings are depreciated over a period of 30-50 years, building improvements are depreciated over a period of 10-25 years and machinery and equipment is depreciated over a period of 2-20 years.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (see Note 6).

Goodwill and Other Intangible Assets

Goodwill represents the excess of the cost of an acquisition over the fair value of the Company's share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Other intangible assets comprise of trademarks with an indefinite useful life which are carried at cost less accumulated impairment losses and land use rights with a useful life of 50 years, which are carried at cost less accumulated amortization and impairment losses. Amortization of land use rights is calculated using the straight-line method.

Goodwill and other intangible assets with an indefinite useful life are allocated to cash generating units for the purpose of impairment testing. The allocation is made to those cash

generating units or groups of cash generating units that are expected to benefit from the business combination in which trademarks and goodwill arose.

Impairment of Non-Financial Assets

Assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment and whenever there is an indication that the asset may be impaired. Impairment losses on goodwill are not reversed. Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units). Non financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

Offsetting of Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Financial Assets

The Company classifies its financial assets in the following categories: financial assets at fair value through profit or loss, loans and receivables, and available-for-sale. The classification depends on the purpose for which the financial assets were acquired. Financial assets are recognised at trade date. Management determines the classification of its financial assets at initial recognition and reevaluates this designation at every reporting date.

a) Financial assets at fair value through profit or loss
Derivatives are categorized as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if they are either held for trading or are expected to be realized within 12 months of the balance sheet date.

b) Loans and receivables
Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for those with maturities greater than 12 months after the balance sheet date. These are classified as non-current assets ("Other non-current assets"). Loans and receivables are classified as "trade and other receivables" and "cash and cash equivalents" in the balance sheet (see Note 9).

c) Available-for-sale financial assets
Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date.

Available-for-sale financial assets are initially recognised at fair value including any transaction costs. Transaction costs of financial assets carried at fair value through profit or loss are

expensed in the income statement. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership. Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables are initially recognised at fair value and subsequently carried at amortized cost using the effective interest method. Changes in the fair value of available-for-sale financial assets are recognised in other comprehensive income.

When financial assets classified as available-for-sale are sold or impaired, the accumulated fair value adjustments recognised in equity are included in the income statement as "Interest and investment income".

The Company assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss, is removed from equity and recognised in the income statement. The accounting policy for trade and other receivables follows.

Derivative Financial Instruments and Hedging Activities

The Company records all derivatives on the balance sheet at fair value. The Company uses derivative instruments, specifically foreign exchange forward and option contracts, to hedge the foreign exchange risk related to forecasted foreign currency denominated cash flows. However, derivatives are not designated as hedging instruments as part of formal hedge relationship qualifying for hedge accounting under IAS 39.

The full fair value of a derivative instrument is classified as a non-current asset or liability when the remaining maturity of the hedged item is more than 12 months, and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

The Company enters into hedging relationships to limit the foreign exchange rate risk for periods generally not to exceed one year. The Company recognised all changes in the fair value of the instruments in the income statement ("Other non-operating income/expense, net"). The Company does not utilize financial instruments for trading or speculative purposes.

Inventories

Inventories are stated at the lower of cost and net realizable value. Cost being determined on a first-in first-out basis ("FIFO"). The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads (based on normal operating capacity). Borrowing costs are not included in the costs of finished goods and work in progress. Net realizable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

Trade and Other Receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortized cost using the effective interest method, less any provision for impairment. A provision for

impairment of trade receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The carrying amount of the asset is reduced through the use of a provision account, and the amount of the loss is recognised in the income statement within selling and marketing costs. When a trade receivable is uncollectible, it is written off against the provision account for trade receivables. Subsequent recoveries of amounts previously written off are credited against "Other operating income/expense, net" in the income statement.

Payment terms differ depending on the customer (large distributors, small shops), product line (winter sports is a very seasonal business, whereas racquet sports and diving products experience almost no seasonality), country (payment terms vary in accordance with local practices throughout the world) and past experiences with customers. It is the Company's normal procedure to agree terms of transactions, including payment terms (60 to 180 days), with customers in advance. In the rental business the Company may have to agree to payment terms over one year and classifies those long-term trade receivables as non-current assets in the consolidated balance sheet.

Cash and Cash Equivalents

Cash and cash equivalents comprise of cash and short-term, highly liquid investments with an original maturity of three months or less. Bank overdrafts are shown within "Borrowings" in current liabilities on the balance sheet.

Restricted Cash

Restricted cash comprises of deposits on escrow accounts and of deposits pledged as collateral. The amounts are collateralized with several financial institutions and earn interest while in deposit.

Share Capital

Ordinary shares are classified as equity (see Note 12). Where any group company purchases the Company's equity share capital (treasury shares), the consideration paid, including any directly attributable incremental costs (net of income taxes) is deducted from equity attributable to the Company's equity holders until the shares are cancelled or reissued. Where such shares are subsequently reissued, any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the Company's equity holders.

Trade and other Payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities

if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade and other payables are recognised initially at fair value and subsequently measured at amortized cost using the effective interest method.

Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method. Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

Current and Deferred Income Tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised directly in other comprehensive income. In this case, the tax is also recognised in other comprehensive income.

The current income tax charge is calculated on the basis of the tax laws enacted in the countries where the Company's subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

The Company utilizes the liability method of accounting for deferred income taxes whereby deferred tax assets and liabilities are recognised to reflect the future tax consequences attributable to temporary differences between the financial reporting bases of existing assets and liabilities and their respective tax bases. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. With the exception of Head Holding Unternehmensbeteiligung GmbH, all of the Company's Austrian subsidiaries are included in a consolidated Austrian federal income tax return. Separate provisions for income taxes have been prepared for the Company's other subsidiaries. Deferred taxes are calculated by using the tax rates that are expected to apply to the period when the asset is realized or the liability is settled. Deferred income tax assets are recognised for tax loss carry-forwards to the extent that the realization of the related tax benefits through future taxable profits is probable.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Employee Benefits

(a) Retirement benefit obligations

The Company operates various pension and other employee benefits schemes. The schemes are partly funded and partly determined by periodic actuarial calculations. The Company has both defined benefit and defined contribution plans.

A defined contribution plan is a plan under which the group pays fixed contributions into a separate entity. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. A defined benefit plan is a plan that is not a defined contribution plan. Typically defined benefit plans define an amount of benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise. Past-service costs are recognised immediately in the income statement.

For defined contribution plans, the group pays contributions to publicly or privately administered insurance plans on a mandatory, contractual or voluntary basis. The Company has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due.

(b) Termination benefits

Termination benefits are payable when employment is terminated by the group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits at the earlier of the following dates: (a) when the Company can no longer withdraw the offer of those benefits; and (b) when the Company recognises costs for a restructuring that is within the scope of IAS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to their present value.

(c) Share-based compensation

The Company has operated a number of share-based compensation plans. The plans are treated either as equity-settled or cash-settled. The change in fair value of the employee services received in exchange for the grant of the options is recognised in share based compensation expense. The total amount to be expensed over the vesting period is determined by reference to the fair value of the options granted. Non-market vesting conditions are included in assumptions about the number of options that are expected to vest.

Provisions

Provision for restructuring costs and legal claims are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated. Restructuring provisions consist mainly of employee termination payments. Provisions are not recognised for future operating losses.

The Company provides for the estimated cost of product warranties and product returns at the time revenue is recognised and the Company has a constructive obligation. Warranty provision is established based on the Company's best estimates of the amounts necessary to settle future and existing claims on products sold as of the balance sheet date. Product return provisions are based on the Company's historical experiences.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation.

Revenue Recognition

The Company recognises revenue from the sale of goods, net of VAT, when significant risks and rewards of ownership of the goods are transferred to the buyer. These criteria are generally met when finished products are shipped to the customers and both title and the risks and rewards of ownership are transferred.

Revenues from licensing agreements are recognised over the license term for the fixed license revenue portion and based on underlying customer sales once minimum contractual sales volumes are met for the variable license revenue portion. Prepayments received on long-term licensing agreements are recognised in "Other long-term liabilities".

Provisions based on accumulated experience are recorded for estimated product returns at the time revenues are recognised.

Sales deductions

The Company accrues for customer discounts based upon estimated refund obligations and classifies all sales incentives, which are earned by the Company's customers subsequent to delivery of its product, including cash discounts, volume rebates and other than cash consideration, such as credits that the Company's customer can use against trade amounts owed, as sales deductions.

Interest Income

Interest income is recognised on a time-proportion basis using the effective interest method. When a receivable is impaired, the carrying amount is reduced to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

Leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

The Company leases certain property, plant and equipment. Leases of property, plant and equipment where the Company has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the lease's commencement at the lower of the fair value of the leased property or the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges. The corresponding rental obligations, net of finance charges, are included in non-current liabilities. The interest element of the finance cost is charged to the income statement over the lease period. The property, plant and equipment acquired under finance leases is depreciated over the shorter of the useful life of the asset or the lease term.

Research and Development Costs

Research costs are recognised as cost when incurred. Development costs for changes in design are short term and recognised as cost when they are incurred. Development cost for new products are capitalized if they meet the criteria for recognition as an intangible asset. The Company did not capitalize any development costs.

Earnings per share

(a) Basic

Basic earnings per share are calculated by dividing the profit attributable to equity holders of the Company by the weighted average number of ordinary shares in issue during the year, excluding ordinary shares purchased by the Company and held as treasury shares (see Note 12 and Note 29).

(b) Diluted

Diluted earnings per share are calculated by adjusting the weighted average number of ordinary shares in issue to assume conversion of all dilutive potential ordinary shares.

Note 2.1. – Changes in Accounting Policies

The revised standard IAS 19 "Employee benefits" on accounting for employee benefits is effective for annual periods beginning on or after January 1, 2013. Full retrospective application (with some exceptions) is required in accordance with IAS 8 (Accounting policies, changes in accounting estimates and errors). From January 1, 2013 the Company adopted the amendments with the effects described below.

Consolidated Statement of Financial Position	December 31, 2012 reported	Adjustment	December 31, 2012 restated	January 1, 2012 restated

Note 3 – Financial Risk Management

Financial Risk Factors

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance. The Company uses derivative financial instruments to hedge certain risk exposures.

a) Market Risk

Foreign Exchange Risk
The Company operates in a multi-currency environment in which a portion of its revenues and expenses are denominated in currencies other than the euro. The Company is, as a result, subject to currency translation risk and, to a lesser extent, currency transaction risk. Currency translation risk arises because the Company measures and records the financial condition and results of operations of each of its subsidiaries in their functional currency and then translates these amounts into the reporting currency, the euro. The Company incurs transaction risk when one of its subsidiaries enters into a transaction using a currency other than its functional currency, although the Company reduces this risk by seeking, when possible, to match its revenues and costs in each currency. The Company also hedges part of its planned cash flows in Japanese yen, Swiss francs, British pounds, U.S. and Canadian dollars through forward contracts and options with Austrian and Italian banks. Shifts in currency exchange rates, particularly between the euro and the U.S. dollar, may affect the Company's results of operations, e.g. a strengthening of the U.S. dollar would negatively influence the Company's results. The table below shows the European Central Bank exchange rates for euro for those currencies that mainly influence the Company's results:

	As of December 31,	
1 Euro =	2013	2012
USD	1.3791	1.3194
CHF	1.2276	1.2072
GBP	0.8337	0.8161
JPY	144.7200	113.6100
CAD	1.4671	1.3137
CZK	27.4270	25.1510
BGN	1.9558	1.9558
CNY	8.3491	8.2207
HKD	10.6933	10.2260

Due to the marginal foreign currency risk arising from financial instruments the Company does not disclose any further sensitivity analysis.

Price Risk
The Company is exposed to marketable securities price risk because of marketable securities held by the Company and classified on the consolidated balance sheet as available-for-sale. To

manage its price risk arising from marketable securities, the Company diversifies its portfolio. Due to the marginal price risk the Company does not disclose further sensitivities.

Cash flow and fair value interest rate risk
As the Company has no significant interest-bearing assets – except cash – the Company's income and operating cash flows are substantially independent of changes in market interest rates. Due to relatively low interest rates for cash deposits, the Company does not disclose further sensitivities. The Company operates with several international banks and does not have a lead bank.

The Company's interest rate risk arises from long-term borrowings. Borrowings issued at fixed rates expose the Company to fair value interest rate risk. The Company's main external financial source arises from its 5.25% Bond, issued in September 2013, and other long-term financial agreements. Borrowings issued at variable rates expose the Company to cash flow interest rate risk. During 2012 and 2013, the Company´s borrowings at variable rate were denominated in euro, U.S. dollar, Chinese yuan, Japanese yen and British pounds. Due to the fact that the majority of the borrowings are issued at fixed rates, the Company does not disclose further sensitivities (see Note 15).

b) Credit Risk

Financial instruments which potentially subject the Company to significant concentrations of credit risk consist primarily of cash, cash equivalents, restricted cash, marketable securities and accounts receivable. The Company places cash with high quality financial institutions. The Company's customers are concentrated in the retail industry. However, concentrations of credit risk with respect to trade accounts receivable are limited due to the large number of customers and their dispersion across many geographic areas. The Company generally performs credit reviews and sometimes obtains credit insurance before extending credit. The maximum credit risk of financial assets is the carrying amount.

c) Liquidity Risk

The Company's liquidity needs arise principally from working capital requirements, capital expenditures and the annual interest payment on its 5.25% Bond in September as well as interest payments on other long-term debt. Given the nature of Winter Sports, and to a lesser extent Racquet Sports and Diving, the Company's operating cash flow and working capital needs are highly seasonal. The Company's need for cash is greater in the third and fourth quarters when cash generated from operating activities, together with draw downs from the Company's bank lines and proceeds from sales of marketable securities, are invested in inventories and receivables. Historically, the Company's primary sources of liquidity have been cash provided from operating activities, proceeds from the issuance of debt and equity securities and borrowings under various credit facilities available to the Company's subsidiaries.

Cash flow forecasting is performed in the operating entities of the Company and aggregated on group level. Management monitors rolling forecasts of the Company's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on unused lines of credit (see Note 15) at all times so that the group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such

forecasting takes into consideration the Company's debt financing plans, covenant compliance and compliance with internal ratio targets.

Surplus cash held by the operating entities over and above balance required for working capital management is transferred to the group treasury. Group treasury invests surplus cash in interest bearing current accounts, time deposits, money market deposits and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the above-mentioned forecasts. At December 31, 2013 the Company held money market funds of €5.0 million (2012: €5.0 million) that are expected to readily generate cash inflows for managing liquidity risk.

The table below provides a maturity analysis of the Company's material contractual obligations as of December 31, 2013 (in thousands):

Contractual Obligations	Less than 1 year	1 - 3 years	3 - 5 years	After 5 years	Total
Borrowings, non-current					
5.25% Bond due 2018 (nominal value)	€ --	€ --	€ 60,000	€ --	€ 60,000
Mortgages	3,686	3,050	1,517	--	8,253
Other Long-Term Debt	3,393	2,525	18,128	--	24,046
Sale-Leaseback	217	459	8,280	--	8,956
Operating Leases	4,896	3,804	2,028	915	11,642
Borrowings, current	36,066	--	--	--	36,066
Trade and other payables	44,796	--	--	--	44,796
Other long-term liabilities	--	--	46	--	46

For further details concerning the Company's interest obligations see Note 15.

The table below provides a maturity analysis of the Company's material contractual obligations as of December 31, 2012 (in thousands):

Contractual Obligations	Less than 1 year	1 - 3 years	3 - 5 years	After 5 years	Total
Borrowings, non-current					
8.50% Senior Notes due 2014 (nominal value)	€ --	€ 27,602	€ --	€ --	€ 27,602
Mortgages	2,473	4,194	2,238	413	9,318
Other Long-Term Debt	742	1,498	21,378	2,729	26,347
Sale-Leaseback	209	442	8,514	--	9,165
Operating Leases	4,054	3,954	2,179	1,255	11,441
Borrowings, current	27,418	--	--	--	27,418
Trade and other payables	43,228	--	--	--	43,228
Other long-term liabilities	--	--	--	169	169

The Company uses major international banks to deposit its cash and cash equivalents.

The Company believes that its cash flow from operations together with credit lines will be adequate to meet the anticipated requirements for working capital, capital expenditures and scheduled interest payments.

Capital risk management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including current and non-current borrowings as shown in the consolidated balance sheet) less cash and cash equivalents and available-for-sale financial assets. Total capital is calculated as equity as shown in the consolidated balance sheet plus net debt. The gearing ratios at December 31, 2013 and 2012 were as follows:

Gearing ratio	For the Years Ended December 31, 2013	2012 *restated*
	(in thousands)	
Total borrowings	€ 136,653	€ 99,734
Cash and cash equivalents	(78,318)	(41,153)
Available-for-sale financial assets	(5,010)	(5,011)
Net debt	€ 53,325	€ 53,570
Total equity	€ 173,396	€ 171,286
Total capital	€ 226,721	€ 224,856
Gearing ratio	23.5%	23.8%

The gearing ratio at year-end 2013 was almost unchanged compared to year-end 2012 as net debt and total equity remained on a similar level.

Fair value estimation

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The following table presents the group's financial assets and liabilities that are measured at fair value at December 31, 2013 and 2012.

	December 31, 2013		
	Level 1	Level 2	Total
	(in thousands)		
Assets			
Available-for-sale financial assets	€ 5,010	€ --	€ 5,010
Derivative financial assets	--	1,375	1,375
Total assets	€ 5,010	€ 1,375	€ 6,385
Liabilities			
Derivative financial liabilities	€ --	€ --	€ --
Total liabilites	€ --	€ --	€ --

	December 31, 2012		
	Level 1	Level 2	Total
	(in thousands)		
Assets			
Available-for-sale financial assets	€ 5,011	€ --	€ 5,011
Derivative financial assets	--	835	835
Total assets	€ 5,011	€ 835	€ 5,846
Liabilities			
Derivative financial liabilities	€ --	€ --	€ --
Total liabilites	€ --	€ --	€ --

There were no transfers between level 1 and 2 during the year.

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Company is the current bid price. These assets are included in level 1 and classified as available-for-sale.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Note 4 – Critical Accounting Estimates and Judgements

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The most significant of these estimates are impairments, impairments of trade receivables, product warranties and returns, inventory obsolescence, assumptions to determine employee benefit obligations and

recognition of deferred tax assets. On an ongoing basis, management reviews its estimates based upon currently available information. Actual results could differ from those estimates.

Estimated impairment of trademark and goodwill

The Company tests annually whether trademarks with an indefinite useful life and goodwill amounting to €13.3 million have suffered any impairment, in accordance with the accounting policy stated in Note 2. The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations require the use of estimates (Note 7). No impairment charge was booked in 2013.

If the estimated discount rate applied to the discounted cash flows had been 10% higher than management's estimates, the recoverable amount would be lower by €8.3 million, if the estimated discount rate had been 10% lower than management's estimates, the recoverable amount would be higher by €10.4 million. These assumptions still do not lead to an impairment.

Impairment of trade receivables

The Company recorded an impairment of trade receivables for incurred losses amounting to €2.7 million in 2013 resulting from the inability of its customers to make required payments. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional provisions may be required. The Company specifically analyses accounts receivables and evaluates historical bad debt, customer concentrations, customer creditworthiness, current economic trends and changes in the Company's customer payment terms when evaluating the adequacy of the impairment of trade receivables. These estimations are continually reviewed.

If estimations relating to the percentage of uncollected accounts receivable were increased by 10%, the Company would recognise an additional provision of €0.2 million.

Impairment of Long Lived Assets

Property, plant and equipment with a carrying amount of €48.3 million are initially stated at cost. Depreciation on property, plant and equipment is computed using the straight-line method over their estimated useful lives. The Company has determined useful lives of property, plant and equipment after consideration of historical results and anticipated results based on the Company's current plans. The estimated useful lives represent the period the asset remains in service assuming normal routine maintenance. The Company reviews the estimated useful lives assigned to property, plant and equipment when the business experience suggests that they do not properly reflect the consumption of the economic benefits embodied in the property, plant or equipment nor result in the appropriate matching of cost against revenue. Factors that lead to such a conclusion may include physical observation of asset usage, examination of realized gains and losses on asset disposals and consideration of market trends such as technological obsolescence or change in market demand.

When events or changes in circumstances indicate that the carrying amount may not be recoverable, property, plant and equipment are reviewed for impairment. When such assets' carrying value is greater than the recoverable amount, an impairment loss is recognised.

According to IAS 36.12 (d) the Company conducted an impairment test for long lived assets, in addition to the annual impairment test for trademarks and goodwill (see Note 7). No impairment charge was booked in 2013. Management determined budgeted gross margin based on past performance and expected market development. The pre-tax discount rate 2013 is 8.7% (2012: 8.2%) and reflects specific risks relating to the Company's business.

If the estimated discount rate applied to the discounted cash flows had been 10% higher than management's estimates, the recoverable amount would be lower by €29.0 million, if the estimated discount rate had been 10% lower than management's estimates, the recoverable amount would be higher by €37.4 million. These assumptions still do not lead to an impairment.

Provision for Product Warranties

The Company provides for the estimated cost of product warranties and product returns at the time revenue is recognised. The warranty provision amounting to €4.1 million is established based on the Company's best estimates of the amounts necessary to settle future and existing claims on products sold as of the balance sheet date. Product return provisions are based on historical experiences. While the Company believes that its warranty and product return provisions are adequate and that the judgement applied is appropriate, such amounts estimated to be due and payable could differ materially from what will actually transpire in the future. The Company updates these estimated charges periodically. The actual product performance and/or field expense profiles may differ, and in those cases the Company adjusts its warranty reserves accordingly. Future warranty expenses may exceed the Company's estimates, which could lead to an increase in cost of sales. Significant differences from estimates did not occur in the past.

If revenues and claims were to increase by 10%, the Company would have to recognise an additional provision of €0.4 million.

Inventory Obsolescence

The Company's chosen markets are competitive and subject to fluctuations in demand and technological obsolescence. The Company periodically reviews its inventory for obsolescence and declines in market value below cost. Estimated obsolescence or unmarketable inventory led to write-downs amounting to €1.0 million of the Company's inventory to the estimated market value based upon assumptions about future demand and market conditions. If actual future demand or market conditions were less favourable than those projected by the Company, additional inventory write-downs may be required.

Employee Benefit Obligations

The present value of Employee Benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions, including the discount rate. Any changes in these assumptions will impact the carrying amount of Employee Benefit

obligations. The Company determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the obligations. In determining the appropriate discount rate, the Company considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related obligation. Other key assumptions are based in part on current market conditions.

Tax Loss Carry Forwards

The Company recognises deferred tax assets on tax loss carry forwards amounting to €63.6 million for which it is probable that they will be realized. The Company has considered future taxable income and ongoing prudent and feasible tax planning strategies. In the event that the Company was to determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax assets would be charged to income in the period such determination was made. Changes in local income tax rates may also affect deferred tax assets.

Note 5 - Segment Information

The Company's business is organised into five divisions for which certain discrete financial information exists. However, the Company's nature of products and production processes are similar, the customers largely the same and also the distribution channels the Company uses are the same for all products. This and similar long-term average gross margins of the segments implicate their similar economic characteristic. In addition, essential decisions of Company's chief decision maker, Mr. Johan Eliasch (CEO), regarding strategy, resources, financing, capital investments and insurance are made on the basis of the Company's performance based on its consolidated operating results and consolidated balance sheet; and liquidity planning is based on the Company's consolidated cash flows. This fulfils the requirements of IFRS 8.12 for aggregation of more operating segments into one reporting segment.

The tables below show net revenues from external customers and long-lived assets by geographic region based on the location of the Company's subsidiaries:

	For the Years Ended December 31,	
	2013	2012
	(in thousands)	
Revenues from External Customers:		
Austria	€ 154,164	€ 141,367
Italy	39,053	36,609
Other (Europe)	41,784	43,887
Asia	25,809	27,896
North America	97,856	93,454
Total Net Revenues	€ 358,667	€ 343,214

Although the Company's homeland is The Netherlands, the Company's economic domestic market is Austria. The Company has no major customers but a large number of customers who disperse across many geographic areas.

Net book value	€	3,145	€	16,368	€	23,964	€	4,799	€	48,276

For the year ended December 31, 2013, the Company's total proceeds on the sale of property and equipment were €0.3 million resulting in a loss of €0.2 million. For the year ended December 31, 2012, the Company's total proceeds on the sale of property and equipment were €0.1 million resulting in a loss of €0.07 million. These losses are included in other operating income, net in the consolidated income statement.

Depreciation expense of €8.0 million has been charged in cost of sales (2012: €8.2 million), €0.4 million in selling and marketing expense (2012: €0.4 million) and €0.7 million in general and administrative expense (2012: €0.7 million). No impairment charge was booked in 2013 and 2012.

Land and buildings with a carrying value of €15.5 million and €9.0 million as of December 31, 2013 and 2012, respectively, are used to secure loans (see Note 15).

Net book value	€	2,795	€	10,543 €	644 €	11,187

Amortization of €0.02 million (2012: €0.02 million) is included in "Cost of sales" in the consolidated income statement.

The Company has determined an indefinite useful life for trademarks as the economic benefit is not limited to a certain period of time.

Impairment test for trademarks and goodwill

The Company completed the annual impairment test in the fourth quarter of 2013 and 2012. Trademarks and goodwill are allocated to the Company's cash-generating units ("CGUs") identified according to country of operation and product category.

The following table provides information with regards to the allocation of trademark and goodwill to the CGU:

	As of December 31,							
	2013				2012			
		Racquet Sports		Diving		Racquet Sports		Diving
		(in thousands)				*(in thousands)*		
Trademark	€	10,543	€	--	€	10,699	€	--
Goodwill	€	1,175	€	1,620	€	1,200	€	1,669

In the impairment test on the trademarks and goodwill, the difference was calculated between the carrying value of the CGU which benefits from the business combination in which trademarks and goodwill arose and its recoverable amount. The recoverable amount of a CGU is determined based on value-in-use calculation. These calculations use cash flow projections based on financial budgets approved by management covering a three-year period. Cash flows beyond the three-year period are extrapolated based on the price increase expected.

Management determined budgeted gross margin based on past performance and expected market development. The pre-tax discount rate 2013 is between 8.7% and 9.1% (2012: between 8.2% and 8.5%) and reflects specific risks relating to the Company's business.

Note 8 – Inventories

Inventories consist of the following:

	As of December 31,			
	2013		2012	
	(in thousands)			
Raw materials and supplies	€	17,470	€	17,257
Work in progress		7,021		6,293
Finished goods		69,689		70,861
Provisions		(11,285)		(11,604)
Total inventories, net	€	82,895	€	82,808

The cost of goods sold recognised as expense and included in "Cost of sales" in the consolidated income statement amounted to €146.0 million and €141.1 million for the year ended December 31, 2013 and 2012, respectively.

The Company recognised an addition to the provision of €1.0 million and €1.6 million for impairment of inventories during the year ended December 31, 2013 and 2012, respectively. The Company used a provision for impaired inventories of €0.6 million and €0.5 million for the year ended December 31, 2013 and 2012, respectively.

Note 9 – Trade and Other Receivables

Accounts receivable consist of the following:

	As of December 31, 2013	As of December 31, 2012
	(in thousands)	
Trade debtors	€ 122,467	€ 115,863
Other receivables	7,790	10,061
Allowance for doubtful accounts	(10,153)	(11,189)
Total accounts receivable, net	€ 120,104	€ 114,736
Less: long-term portion	(1,306)	(630)
Short-term portion	€ 118,798	€ 114,106

As of December 31, 2013 and 2012, the nominal value of long-term trade receivables was €1.4 million and €0.7 million, respectively. The average interest rate used for discounting was 4.3% and 5.0% for the year ended December 31, 2013 and 2012, respectively.

For the Company's accounts receivable trade there is no credit rating available.

As of December 31, 2013 and 2012, for trade receivables that are neither impaired nor past due, there are no indicators that the debtors will not meet their payment obligations. There is no concentration of credit risk with respect to trade receivables, as the Company has a large number of customers, internationally dispersed.

Other receivables do not contain impaired assets.

	As of December 31, 2013

Trade debtors	122,467	115,863
Allowance for doubtful accounts	(10,153)	(11,189)
	€ 112,314	€ 104,674

The following table shows the development of allowances on trade receivables:

	December 31,	
	2013	2012
	(in thousands)	
Balance as of January 1	€ 11,189	€ 11,281
Additions	2,674	2,649
Used	(1,660)	(538)
Released	(1,621)	(1,943)
Translation adjustments	(429)	(260)
Balance as of December 31	€ 10,153	€ 11,189

The following table presents income from recoveries on trade receivables written off:

	For the Years ended December 31,	
	2013	2012
	(in thousands)	
Income from recoveries on receivables written off	€ 91	€ 215

All income and expenses relating to allowances and write-offs of trade receivables are reported under selling and marketing expense. Subsequent recoveries of amounts previously written off are credited against other operating income, net in the income statement.

The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable mentioned above.

Note 10 – Available-for-Sale Financial Assets

Available-for-sale financial assets consist of the following:

	As of December 31,	
	2013	2012
	(in thousands)	
Available-for-Sale, short-term		
Money market funds	€ 5,010	€ 5,011
Total Financial assets available-for-sale, current	€ 5,010	€ 5,011

In 2013 and 2012, money market funds consisted of one subordinated bond.

Available-for-sale financial assets developed as follows during the years ended December 31, 2013 and 2012:

		Available-for-sale financial assets
		Current
		(in thousands)
Balance as of January 1, 2012	€	4,875
Change in fair value, recognized in other comprehensive income		136
Balance as of December 31, 2012	€	5,011
Change in fair value, recognized in other comprehensive income		(1)
Balance as of December 31, 2013	€	5,010

The following table is a summary of the Company's financial assets' (denominated in euro) gross unrealized losses and fair value, aggregated by category and length of time that individual financial assets have been in an unrealized loss position, at December 31, 2013 and 2012:

	As of December 31, 2013			
	Less Than 12 Months			
		Fair Value		Unrealized Losses
	(in thousands)			
Money market funds	€	5,010	€	(5)
Total securities at fair value	€	5,010	€	(5)

	As of December 31, 2012			
	Less Than 12 Months			
		Fair Value		Unrealized Losses
	(in thousands)			
Money market funds	€	5,011	€	(4)
Total securities at fair value	€	5,011	€	(4)

The Company considers money market funds to be almost cash. None of these financial assets are either past due or impaired.

Note 11 - Derivative Financial Instruments

The Company uses derivative instruments, specifically foreign exchange forward and option contracts, to hedge the foreign exchange risk related to its forecasted foreign currency denominated cash flows.

The following table provides information regarding the Company's foreign exchange forward and option contracts as of December 31, 2013 and 2012. The fair value of the foreign currency

contracts represent the amount the Company would receive or pay to terminate the contracts, considering first, quoted market prices of comparable agreements, or in the absence of quoted market prices, such factors as interest rates, currency exchange rates and remaining maturity.

	As of December 31, 2013							
	Notional Principal							
		in euro		Local currency converted into euro		Carrying value (EUR)		Fair value (EUR)
				(in thousands)				
Foreign exchange forward contracts........	€	25,378	€	26,413	€	1,009	€	1,009
Foreign exchange option contracts..........	€	5,078	€	5,548	€	304	€	304

	Notional Principal									
		in USD		Local currency converted into USD		Carrying value (USD)		Fair value (USD)		Fair Value (EUR)
						(in thousands)				
Foreign exchange forward contracts........	USD	11,070	USD	11,164	USD	86	USD	86	€	62
Foreign exchange option contracts..........	USD	--	USD	--	USD	--	USD	--	€	--

	As of December 31, 2012							
	Notional Principal							
		in euro		Local currency converted into euro		Carrying value (EUR)		Fair value (EUR)
				(in thousands)				
Foreign exchange forward contracts........	€	25,214	€	25,840	€	624	€	624
Foreign exchange option contracts..........	€	1,553	€	1,570	€	37	€	37

	Notional Principal									
		in USD		Local currency converted into USD		Carrying value (USD)		Fair value (USD)		Fair Value (EUR)
						(in thousands)				
Foreign exchange forward contracts........	USD	6,411	USD	6,482	USD	61	USD	61	€	46
Foreign exchange option contracts..........	USD	4,181	USD	4,330	USD	168	USD	168	€	128

The counterparties to the foreign currency contracts are major international banks. Such contracts are generally for one year or less. Foreign exchange contracts are recorded in trade and other receivables or trade and other payables according to their fair value.

Note 12 –Equity

The Company is a Naamloze Vennootschap ("N.V."), a Dutch public Company with limited liability. The registered capital of a N.V. can be in the form of bearer shares or registered shares. The minimum registered and authorized capital requirement is €225,000 and the minimum paid in capital requirement for a N.V. is €45,000.

Other reserves include additional paid-in capital as well as amounts resulting from various transactions booked directly to equity.

As at December 31, 2013 the nominal value of each of the 92,174,778 shares (2012: 92,174,778 shares) issued was €0.01 (2012: €0.01), all fully paid.

At the general meeting of shareholders on May 27, 2010, the resolution was taken to increase the authorized share capital to €4.000.000. It is divided into 200,000,000 ordinary shares with a nominal value of €0.01 per share and 200,000,000 preference shares with a nominal value of €0.01 per share.

	As of December 31,	
	2013	2012
	(in thousands)	
Shares issued	92,175	92,175
Less: Shares held by the Stichting	(260)	(260)
Less: Shares held by Head N.V.	(8,396)	(8,396)
Shares issued less treasury shares	83,519	83,519

Dividends

In 2013 and 2012, the Company did not pay a dividend.

Stichting

The Stichting Head Option Plan (the "Stichting") is a Dutch foundation, the Board of which is Head Sports Holdings N.V., an entity that is ultimately controlled by Mr. Johan Eliasch and his family members. The Stichting holds, votes, and receives dividends on certain of the Company's ordinary shares. In conjunction with the Company's option plans (see Note 23), the Stichting also issues depository receipts to option holders, upon exercise of the option. Holders of depository receipts are entitled to dividends paid on the Company's shares and to proceeds on the sales of their shares upon request to the Stichting. However, such holders have no voting rights.

As of January 1, 2004, in accordance with SIC 12 "Consolidation – Special Purpose Entity" the Company consolidated the Stichting, as the Company was considered the main beneficiary of the Stichting. As a result of consolidating the Stichting shares held by the Stichting are presented as treasury shares in the consolidated balance sheets.

Treasury Shares

Pursuant to resolutions which were approved on April 25, 2013, the Board of Management is authorized to buy back a maximum of 50% of the Company's issued share capital during a period of 18 months.

The following table provides information about the movement of the number of treasury shares:

	As of December 31,	
	2013	2012
	(in thousands)	
Number of shares as of January 1	8,656	8,656
Transfer of treasury shares	--	--
Number of shares as of December 31	8,656	8,656

As of December 31, 2013 and 2012, the Company owned 8,656,270 shares of treasury shares. 260,022 shares were held by the Stichting, 8,396,248 shares were held by Head N.V..

Conditional Offer to Buy Back Shares

On December 13, 2013, the Company announced that it has commenced a cash Offer to repurchase up to 22,429,265 Shares of its share capital at a price of €1.90 per Share. The Offer is contingent upon the acceptance by shareholders representing at least 19,214,042 Shares, although Head has the right to waive this contingency. Full details of the Offer, including a number of terms and conditions, can be found on our website. For further information it is referred to in Note 31.

Majority Shareholder

Head Sports Holdings N.V and its shareholders controlled 61,089,243 shares, or approximately 66.28% of the Company's issued shares, as of December 31, 2013. Head Sports Holdings N.V., a Netherlands Antilles corporation, and its shareholders are controlled by Mr. Johan Eliasch and his family members resulting in the ability to significantly influence and control the Company's operations.

Note 13 – Trade and Other Payables

Accounts payable consist of the following:

	As of December 31, 2013	As of December 31, 2012
	(in thousands)	
Trade payables	€ 22,355	€ 23,665
Allowances	4,428	3,813
Commissions	3,266	2,403
Personnel expenses	9,760	8,578
Deferred Income	2,380	2,271
Interest	1,190	1,346
Legal, Audit, Consulting	2,370	1,881
Fiscal Authorities	3,636	4,026
Advertising	3,501	3,251
Social Institution	1,674	1,293
Freight & duties	1,639	1,751
Other	6,047	5,118
Total	€ 62,246	€ 59,396

All trade and other payables are current as the settlement is expected within 12 months.

Note 14 – Provisions

Provisions consist of the following:

	Warranty	Product Liability	Litigation	Other	Total
			(in thousands)		
Net book value as of January 1, 2012	€ 3,761	€ 81	€ 3,621	€ 3,777	€ 11,240

Exchange difference	(2)	--	(17)	(232)	(251)
Net book value as of December 31, 2013	€ 4,066	€ 93	€ 3,148	€ 2,083	€ 9,390

	As of December 31,	
	2013	2012
	(in thousands)	
Non-current	€ 2,668	€ 3,475
Current	6,723	7,325
	€ 9,390	€ 10,800

Based on the nature of our business and the liabilities involved, most of our provisions are materially considered current, based on the criteria in IAS 1.69. The cash outflow for the current portion is expected to occur within 12 months.

Warranty
The Company sells certain of its products to customers with a product warranty that provides free of cost repairs or the issuance of credit notes to the customer. The length of the warranty term varies from one to two years and depends on the product being sold. The Company accrues its estimated exposure to warranty claims based upon historical warranty claim costs as a percentage of sales multiplied by prior sales still under warranty at the end of any period. In 2013, the Company classified €2.7 million (2012: €2.5 million) as non-current warranty provision where the outflow of resources occurs after 12 months.

Product Liability
Some of the Company's products are used in relatively high-risk recreational settings, and from time to time the Company is named as a defendant in lawsuits asserting product liability claims relating to the Company's sporting goods products. The Company maintains product liability based on past experiences and taking into account the coverage of the Company's product liability insurance. Management regularly reviews any cases and adjusts its estimations.

Litigation
From time to time the Company and its subsidiaries are involved in legal proceedings, claims and lawsuits arising in the ordinary course of business such as suits with several parties including competitors, customers for past receipts, former employees, suppliers and licensees. However, management believes that the resolution of these matters will not materially affect the Company's financial position.

A class action lawsuit has been filed against Head USA Inc., a subsidiary of the Company in the U.S. related to the marketing of Head USA Inc. Head USA Inc. has challenged the validity of the plaintiff's claims and moved to dismiss the lawsuit. The first motion of Head USA Inc. to dismiss was granted and plaintiff's lawsuit was dismissed. On August 8, 2013, the plaintiff has filed an amended lawsuit. Head USA Inc. believes its marketing does not violate any U.S. consumer laws and will defend itself.

Other
The Company's requirements in respect of product return risk in various markets depend on the relationship with the customers and is based on a constructive obligation (IAS 37.10) deriving from a long-term co-operation. Although each and every individual product return is not considered probable, such product return provision is not based on individual

considerations, but based on a large population of items, in line with the requirements of providing for warranties and in accordance with the requirements of IAS 37.39. Considering the constructive obligation for product return and the element of a large population of items this does result in a probable outflow of resources. Historically, the actual use of this provision supports the existence of a liability.

A provision of €1.0 million was recorded in relation to an environmental matter and was classified as non-current in 2012 and 2011. In 2013, this environmental matter was settled and the unused amount of the provision was booked to income.

Note 15 – Borrowings

Borrowings, current

Borrowings, current consist of the following:

	As of December 31,	
	2013	2012
	(in thousands)	
Lines of credit	€ 36,066	€ 27,418
Current maturities of borrowings, non-current	7,296	3,424
Total Borrowings, current	€ 43,362	€ 30,842

In the second quarter of 2001, the Company's subsidiaries entered into a financing agreement providing multiple revolving credit lines with the "Österreichische Kontrollbank" ("OEKB") which were renegotiated in 2003, in the total amount of €15.0 million secured by all Austrian trade receivables. During 2011, the "OEKB" and one of the Company´s Austrian banks have agreed to increase the existing line by €3.8 million leading to a total amount of €18.8 million as of December 31, 2012 and 2013. As of December 31, 2013, the fair value of trade receivables that serve as collateral for the Company's revolving credit lines was €50.6 million (2012: €44.4 million).

During the third quarter of 2013, HTM Sport GmbH, a subsidiary of Head N.V., signed an agreement with an Austrian Bank for a new €10.0 million line of credit. This line is secured by a 40% state guarantee via "OEKB" as well as the pledge of the properties of the HTM Czech Ski Boot factory in Litovel and the Head Czech Ski factory in Budweis.

In addition, the Company used lines of credit with several banks in Japan, France and UK of €7.3 million and had unused lines of credit of €21.2 million as of December 31, 2013. In 2012, the Company used lines of credit with several banks in Japan, France and UK of €8.7 million and had unused lines of credit of €15.2 million as of December 31, 2012.

In July 2012, certain Austrian subsidiaries of the Company entered into a loan agreement with an Austrian Bank providing a maximum of €15.0 million (from July 1 until December 31) and of €3.0 million (from January 1 until June 30). This agreement expires on December 31, 2014 and requires the Company to achieve certain yearly financial covenants. The loan is secured by certain Austrian trade receivables as well as by the inventories of certain Austrian subsidiaries in various warehouses. In addition, Mr. Johan Eliasch, the Company´s CEO, granted a personal non-performance guarantee ("Ausfallsbürgschaft") up to a maximum amount of €5.0 million to ensure the fulfillment of the obligations of the subsidiaries of the Company under the loan. In the third quarter of 2013, this loan agreement was renegotiated. It was agreed to reduce the maximum amount available from July 1 until December 31 from €15.0 million to €10.0 million and to increase the personal non-performance guarantee of Mr. Johan Eliasch from a maximum amount of €5.0 million to a maximum amount of €10.0 million. At December 31, 2012 and 2013 the Company did not use this credit line.

The weighted average interest rate on outstanding short-term borrowings was 2.08% and 1.71% as of December 31, 2013 and 2012, respectively.

The amount of current borrowings recognised in the consolidated balance sheet approximates the fair value.

In case entities within the group default on their loan agreement, the relevant bank has the right to receive the cash flows from the financial assets serving as collateral at the time of default.

Borrowings, non-current

Borrowings, non-current consist of the following:

	As of December 31,			
		2013		2012
		(in thousands)		
Bond	€	59,331	€	--
Senior notes		--		27,485
Liability against venture partner		2,610		2,729
Other long-term debt		38,645		42,103
Total borrowings, non-current	€	100,586	€	72,316
Less current portion		(7,296)		(3,424)
Non-current portion	€	93,291	€	68,893

Bond

On September 2, 2013, Head N.V. and HTM Sport GmbH, a subsidiary of Head N.V., announced the issuance of a new €45.0 million Bond. On September 26, 2013, Head N.V. and HTM Sport GmbH announced the increase in size from €45.0 million to €60.0 million based on additional investor demand. The Bond was issued in Switzerland by HTM Sport GmbH and guaranteed by Head N.V. The securities are Euro denominated, carry a fixed coupon of 5.25% payable annually in arrears in September, and have a term of 5 years with maturity on September 26, 2018. Transaction settlement date was September 26, 2013. The Bond is listed on the SIX Swiss Exchange (SIX).

Until the maturity date of the Bond an addition to disagio of €0.7 million will be booked to liabilities.

The effective interest rate for the Bond in 2013 was 5.31%.

Senior Notes

At December 31, 2012, the Company had €27.5 million of 8.5% Senior Notes outstanding. On May 6, 2013, Head N.V. and HTM Sport GmbH, a subsidiary of Head N.V., announced the redemption in full of the outstanding Senior Notes due 2014. The Senior Notes were fully redeemed on June 5, 2013.

Liability against venture partner

In July 2005, the Company signed an agreement for the establishment of a company in the British Virgin Islands. The business venture was established to found a Chinese company which manufactures tennis balls for exclusive sale to the Company. The Company and its venture

partner have a 83% and 17% interest in the formed company, respectively. This venture qualifies as a special purpose entity due to the fact that the Chinese company was formed to manufacture tennis balls solely on behalf of the Company. As a result the Company consolidated this entity from inception. At December 31, 2013, the Company recorded a liability of €2.6 million (2012: €2.7 million) for the contribution of its partner.

The Company's partner in this venture has the right to receive a guaranteed yearly dividend of 12% on its investment balance.

In the third quarter of 2013, it was agreed that the Company will acquire the 17% interest of its venture partner (see Note 31). As a consequence, the liability of €2.6 million as of December 31, 2013 was reclassified to current borrowings in the consolidated statement of financial position.

Other long-term debt

Sale-Leaseback Transaction

One of the Company's subsidiaries entered into an agreement on June 28, 2002, whereby it sold land and building to an unrelated bank and leased it back over a 15 year term. The proceeds of this sale were €10.6 million. The Company has the obligation to purchase the property back after 15 years for €8.2 million. The Company had the option to repurchase the property from the first until the tenth year of the arrangement for the present value of the future lease payments and the remaining residual value. This option was not exercised during 2012.

In 2012, the Company renegotiated the terms of the agreement resulting in a reduction of the interest rate and consequently in a reduction of the total payments. The Company is required to pay the bank a monthly deposit of €0.02 million, which will be repaid to the Company, plus interest of 3.8%, at the time of repurchase.

Because of the Company's continuing involvement, this transaction has been accounted for as a finance lease such that the Company has recorded €10.6 million of cash and long-term borrowings at the inception date of this agreement. At December 31, 2013, the remaining obligation under the financing agreement is €9.0 million (2012: €9.2 million).

The Company's future minimum lease payments are as follows:

		As of December 31, 2013
		(in thousands)
2014	€	555
2015		555
2016		555
2017		8,438

Long-term Finance Lease Obligation	€	8,956

As of December 31, 2013, the net book value of land and building under the sale-leaseback arrangement consists of the following (in thousands):

		Land		Building
Cost	€	1,020	€	8,386
Less: Accumulated depreciation		--		(7,873)
Net book value	€	1,020	€	513

Mortgage Agreements

In 2002, one of the Company's subsidiaries entered into a mortgage agreement secured by the Penn Phoenix property with an unrelated financial institution of €4.9 million ($4.8 million) over a 15 year term at an interest rate of 7.33%. At December 31, 2013, the outstanding balance of the mortgage was €1.3 million (2012: €1.6 million) and the carrying value of the property was €1.1 million (2012: €1.3 million).

During 2012, the Company renegotiated an agreement with a Chinese bank and agreed to enter into a loan agreement expiring in August 2015 and providing RMB 30.0 million (€3.7 million). The loan is repayable in quarterly installments of RMB 2.5 million (€0.3 million) starting end of November 2012. The interest rate is fixed at 7.13%. In addition it was agreed that each installment of RMB 2.5 million is instantly replaced by another one-year term loan of RMB 2.5 million at an interest rate to be agreed at this time. As a result, at December 31, 2012 and 2013 the outstanding balance of the mortgage was RMB 30.0 million (€3.6 million). The loan is secured by the Company´s Chinese subsidiary´s property and building. At December 31, 2013 the carrying value of the property was €2.4 million (2012: €2.6 million).

In April 2011, the Company secured a new long term loan in Italy with Mares S.p.A. The loan amounted to €5.0 million with a seven-year term. For the first five years the interest rate is fixed at 4.66% while for the last two years the interest rate is variable based on the six-month Euribor plus a 1.90% margin. The loan is secured by the Rapallo and partly Casarza property of Mares S.p.A. At December 31, 2013 the outstanding balance of the loan was €3.4 million (2012: €4.1 million) and the carrying value of the property was €3.3 million (2012: €3.5 million).

Other long-term debt

In 2011, the Company secured a new long term agreement until 2016 with a Japanese bank. At December 31, 2013 the outstanding balance of the loan was €2.4 million (2012: €3.5 million) at a fixed interest rate of 3.95%.

In September 2011, one of the Company´s subsidiaries entered into an asset backed revolving credit agreement with an US-bank providing a maximum of USD 40.0 million dependent on the level, and secured by, eligible US inventories and receivables. As of December 31, 2013, eligible US inventories and receivables amounted to USD 26.5 million (2012: USD 25.5 million) and USD 21.9 million (2012: USD 19.5 million), respectively. The original agreement covered five years, the interest rate is variable. In the third quarter of 2013, this credit agreement was extended until August 2018. At December 31, 2012 the Company used USD 25.0 million (€18.9 million) of this facility at an interest rate of 2.00%. At December 31, 2013 the Company used USD 25.0 million (€18.1 million) of this facility at an interest rate of 2.00%.

Other long-term debt comprises a loan in Italy and two small loans in Austria with an outstanding balance of €0.9 million in total at December 31, 2013.

The weighted average interest rate on other long-term debt was 2.33% as of December 31, 2013 and 2012. Borrowings mature at various dates through 2018.

In case entities within the group default on their loan agreement, the relevant bank has the right to receive the cash flows from the financial assets serving as collateral at the time of default.

Note 16 – Additional Disclosures on Financial Instruments

Cash and cash equivalents and trade and other receivables mainly have short times to maturity. For this reason, their carrying amounts at the reporting date approximate the fair values. Trade and other payables, as well as other liabilities, generally have short times to maturity; the values reported approximate the fair values. The fair values of the Bond and the Senior Notes equal the nominal amounts multiplied by the price quotations at the reporting date. The fair values of liabilities to banks and other financial liabilities are calculated as the present values of the payments associated with the debts, based on the applicable yield curve and the Company's credit spread curve for specific currencies.

The tables below shows net gain (loss) by category for 2013 and 2012:

	For the Year Ended December 31, 2013					
		From Subsequent Measurement				
	Interest Income/ (Expense)	Fair Value Gain/ (Loss)	Foreign Exchange Gain/ (Loss)	Impair-ment	Gain (Loss) on Disposal	Net Gain/ (Loss)
	(in thousands)

	€ (4,153)	€ 7	€ 310	€ (1,015)	€ 147	€ (4,703)

	For the Year Ended December 31, 2012					
		From Subsequent Measurement				
	Interest Income/ (Expense)	Fair Value Gain/ (Loss)	Foreign Exchange Gain/ (Loss)	Impair-ment	Gain (Loss) on Disposal	Net Gain/ (Loss)
	(in thousands)					
Loans and receivables (LaR)	€ 624	€ --	€ (942)	€ (724)	€ 190	€ (852)
At fair value through profit or loss (FVtPL)	--	578	475	--	--	1,052
Available-for-sale financial assets (AfS)	203	--	--	--	--	203
Financial liabilities at amortized cost (FLaC)	(5,332)	(235)	189	--	--	(5,377)
	€ (4,504)	€ 343	€ (278)	€ (724)	€ 190	€ (4,973)

The Company recognised all components of net gain/loss in "Interest and investment income", "Interest and other finance expense", "Other operating income, net" and "Other non-operating income, net". Impairment of trade receivables is reported under "Selling and marketing expense".

Note 17 – Other Long-Term Liabilities

	As of December 31,	
	2013	2012
	(in thousands)	
Deferred income, non-current	€ 3,302	€ 4,575
Liability on share-based payments	477	395
Capitalized Lease Obligations	2,301	2,563
Other	56	179
Total other long-term liabilities	€ 6,136	€ 7,712

Deferred income, non-current

Other long-term liabilities include a long-term portion of deferred income from long-term licensing agreements.

In July 2005, the Company agreed to extend an existing long-term licensing agreement started on April 1, 2005 for a further 10 years until 2019 and has received a prepayment in the amount of €4.9 million for the extended period. Additionally, the payment terms of the original agreement have been amended and it was agreed that the prepayment of €4.1 million received in November 2004 represents a one time fee with no future royalty payments. The prepayments were recorded as deferred income in the consolidated statement of financial position and are recognised over the contract period.

In 2010, the Company entered into another long-term licensing agreement. The prepayments amounted to €1.4 million as of December 31, 2010. In January 2011, the Company received the residual amount of the agreed prepayment of €1.4 million. The prepayments were recorded as deferred income in the consolidated statement of financial position and are recognised over the contract period.

At December 31, 2013, the deferred income balance (non-current portion) associated with all long-term licensing agreements was €3.3 million (2012: €4.6 million). The Company recognised the short-term portion of the long-term licensing agreements of €1.1 million (2012: €1.1 million) in trade and other payables.

Liability on share-based payments

The Company records liabilities on share-based payments in relation to its stock option plans (see Note 23). The increase of the liability is mainly due to the increase of the share price at December 31, 2013 compared to December 31, 2012.

Capitalized Lease Obligations

Some of the Company´s subsidiaries in Austria and the subsidiaries in the Czech Republic entered into finance lease agreements. As of December 31, 2013 the capitalized lease obligations amounted to €2.3 million (2012: €2.6 million).

Other

In October 2011, the Company signed a joint venture agreement to set up a distribution company in Japan in which it holds 50%. According to the agreement, the Company shows a long term liability as of December 31, 2013 of €0.05 million regarding an agreed exit option (see Note 22).

Note 18 – Employee Benefits

The revised standard IAS 19 "Employee benefits" on accounting for employee benefits is effective for annual periods beginning on or after January 1, 2013. Full retrospective application (with some exceptions) is required in accordance with IAS 8 (Accounting policies, changes in accounting estimates and errors).

The Company funds pension and other employee benefit plans paid to employees at some Austrian, other European and Japanese locations. The indemnities are based upon years of service and compensation levels and are generally payable upon retirement or dismissal in some circumstances, after a predetermined number of years of service. For the year ended December 31, 2013 and 2012 the only plan that includes plan assets is the French pension plan. The Company maintains sufficient assets to meet the minimum funding requirements set forth by the regulations in each country. The discount rate is based on the return of high quality corporate bonds at the reporting date.

Pension and other employee benefit plans have developed as follows:

		As of December 31,		
		2013		2012 *restated*
		(in thousands)		
Beginning of the year	€	19,630	€	16,754
Charge to income		1,414		1,484
Remeasurements loss (gain)		(29)		2,462
Payments		(1,959)		(986)
Reclassification		(59)		--
Translation adjustment		(160)		(84)
End of the year	€	18,836	€	19,630

The table below outlines where the Company´s pension and other employee benefit amounts are included in the financial statements:

		2013		2012 *restated*
		(in thousands)		
Balance Sheet obligations for:				
Pension Benefits	€	5,727	€	7,024
Other Benefits		13,109		12,606
Total	€	18,836	€	19,630
Income Statement charge for:				
Pension Benefits	€	352	€	362
Other Benefits		1,062		1,122
Total	€	1,414	€	1,484
Remeasurements loss (gain) for:				
Pension Benefits	€	(277)	€	1,380
Other Benefits		248		1,081
Total	€	(29)	€	2,462

The movement in the defined benefit obligation for pension plans over the year is as follows:

	Pension Benefits		
2012 restated	Present Value of Obligation	Fair Value of Plan Assets	Total
		(in thousands)	
At January 1, 2012 €	**5,695 €**	**(337) €**	**5,358**
Current service cost	123	--	123
Interest expense/(income)	256	(16)	239
	379	(16)	362
Remeasurements loss (gain):			
From change in financial assumptions	1,370	--	1,370
Experience adjustments	10	--	10
	1,380	--	1,380
Benefit payments	(108)	32	(76)
At December 31, 2012 €	**7,345 €**	**(321) €**	**7,024**
At January 1, 2013 €	**7,345 €**	**(321) €**	**7,024**

Past service credit	(15)	--	(15)
Interest expense/(income)	221	(14)	207
	365	(14)	352
Remeasurements loss (gain):			
From change in financial assumptions	56	--	56
Experience adjustments	(335)	--	(335)
Return on Plan Assets, excluding amounts included in interest expense/(income)	--	2	2
	(279)	2	(277)
Benefit payments	(1,371)	--	(1,371)
At December 31, 2013 €	**6,060 €**	**(333) €**	**5,727**

The plan assets of the French pension plan consist of an insurance contract.

The movement in the defined benefit obligation for other employee benefit plans over the year is as follows:

	Other Benefits		
2012 restated	Present Value of Obligation	Fair Value of Plan Assets	Total
		(in thousands)	
At January 1, 2012	**€ 11,397**	**€ --**	**€ 11,397**
Current service cost	742	--	742
Interest expense/(income)	380	--	380
	1,122	--	1,122
Remeasurements loss (gain):			
From change in financial assumptions	1,031	--	1,031
Experience adjustments	50	--	50
	1,081	--	1,081
Benefit payments	(910)	--	(910)
Translation adjustments	(84)	--	(84)
At December 31, 2012	**€ 12,606**	**€ --**	**€ 12,606**
At January 1, 2013	**€ 12,606**	**€ --**	**€ 12,606**
Current service cost	746	--	746
Interest expense/(income)	316	--	316
	1,062	--	1,062
Remeasurements loss (gain):			
From change in financial assumptions	179	--	179
Experience adjustments	69	--	69
	248	--	248
Benefit payments	(588)	--	(588)
Reclassification	(59)	--	(59)
Translation adjustments	(160)	--	(160)
At December 31, 2013	**€ 13,109**	**€ --**	**€ 13,109**

Other employee benefits include severance obligations and anniversary bonuses.

The defined benefit obligation for pension and other employee benefit plans and plan assets are composed by country as follows:

	Pension and Other Benefits 2013		
	Austria	Germany	Other
		(in thousands)	
Present Value of Obligation	€ 10,719	€ 4,527	€ 3,923
Fair Value of Plan Assets	--	--	(333)
Total	**€ 10,719**	**€ 4,527**	**€ 3,590**

	Pension and Other Benefits 2012 *(restated)*		
	Austria	Germany	Other
		(in thousands)	
Present Value of Obligation	€ 11,693	€ 4,337	€ 3,922
Fair Value of Plan Assets	--	--	(321)
Total	**€ 11,693**	**€ 4,337**	**€ 3,601**

The significant actuarial assumptions were as follows (expressed as weighted averages):

2012 restated	Pension Benefits		Other Benefits	
	2013	2012	2013	2012
Discount rate	3.0%	3.0%	3.0%	3.3%
Rate of compensation increase	2.4%	3.0%	2.9%	2.9%

If the discount rate applied for pension benefits had been 0.5% higher, the present value of the obligation for pension benefits would be lower by €0.4 million, if the discount rate applied for pension benefits had been 0.5% lower, the present value of the obligation for pension benefits would be higher by €0.5 million.

If the Company had not applied the revised standard IAS 19, the expense in the income statement would be higher by €0.2 million for the year ended December 31, 2013, and the total equity as of December 31, 2013, would be higher by €3.0 million.

The contribution for defined contribution plans for the year ended December 31, 2013 amounted to €0.8 million (2012: €1.0 million).

Note 19 – Operating Leases

The Company leases certain office space, warehouse facilities, transportation and office equipment under operating leases which expire at various dates through 2022. Rent expense was €4.6 million and €4.3 million for the years ended December 31, 2013 and 2012, respectively.

Future minimum payments under non-cancelable operating leases with initial or remaining lease terms in excess of one year are as follows as of December 31, 2013:

		As of December 31, 2013
		(in thousands)
2014	€	4,896
2015		2,317
2016		1,487
2017		1,132
2018		896
Thereafter		915
	€	11,642

In July 2004, Head signed a long-term supplier contract for tennis, squash and racquetball racquets effective April 1, 2005 to renew business relations with an existing supplier. The agreement automatically extended after the agreed expiration date, December 31, 2009, as neither of the two parties had cancelled. This agreement contains an operating lease for warehouse facilities and machinery and equipment. The future minimum payments are included within above table.

Note 20 – Fair Value and Other Reserves Including Cumulative Translation Adjustment

The following table shows the components of fair value and other reserves/CTA:

2012 restated		Foreign Currency Translation Adjustment	Foreign Exchange Loss on Invested Intercompany Receivables	Unrealized Loss on AfS-Securities	Remeasurements Loss on Employee Benefits	Fair Value and Other Reserves/ CTA
				(in thousands)		
Balance at January 1, 2012	€	3,530	(5,791)	(106)	(1,473)	(3,840)
Current period changes, net of tax		--	--	102	(1,832)	(1,730)
Translation Adjustments		(1,235)	--	--	--	(1,235)
Balance at December 31, 2012	€	2,296	(5,791)	(4)	(3,304)	(6,804)
Current period changes, net of tax		--	--	(1)	30	29
Translation Adjustments		(3,215)	--	--	--	(3,215)
Balance at December 31, 2013	€	(920)	(5,791)	(5)	(3,275)	(9,991)

Note 21 – Income Taxes

The following table summarizes the significant differences between the applicable Dutch federal statutory tax rate and the Company's effective tax rate for financial statement purposes.

	As of December 31,	
	2013	2012
		restated
Dutch statutory tax rate	25.0%	25.0%
Tax rate differential	4.1	7.9
Other taxes	4.6	11.9
Prior year adjustments	(3.9)	(5.3)
Non tax deductible costs	(3.9)	(1.5)
Changes in tax rates	(1.1)	1.2
Effect on non-recognized tax losses	6.6	12.6
Effective tax rate	31.2%	51.8%

In 2013 and 2012, the Company´s effective tax rate differed from the statutory tax rate in the Netherlands mainly due to higher tax rates and diverse other taxes in some of the Company´s operating countries and to not recognised tax losses.

The total tax expense includes the following positions:

	As of December 31,	
	2013	2012
		restated
	(in thousands)	
Current income tax expense	€ (2,000)	€ (2,138)
Income tax benefit of prior period adjustments	139	57
Deferred tax benefit relating to the origination and reversal of temporary differences and relating to the recognition of tax losses	1,854	820
Deferred tax expense relating to the use of tax losses	(2,481)	(1,371)
Deferred tax income (expense) relating to changes in tax rates	81	(62)
	€ (2,407)	€ (2,694)

In 2013, the total tax expense of €2.4 million was driven by current income tax expense of €1.9 million. Deferred tax expense in total amounted to €0.5 million mainly resulting from the use of tax losses in some of the Company´s operating countries, partly offset by deferred tax benefits relating to temporary differences. Similar to 2013, the total tax expense in 2012 was driven by current income tax expense (€2.1 million). Deferred tax expense in total amounted to €0.6 million mainly resulting from the use of tax losses in some of the Company´s operating countries.

The movements in deferred tax assets and liabilities during the year ended December 31, 2013 are as follows:

	December 31, 2013	(Charged) /credited to income	(Charged) /credited to OCI	Exchange differences	December 31, 2012 restated

Total deferred tax asset, net	€ 53,354	€ (614)	€ 596	€ (252)	€ 53,624

Deferred income tax assets are recognised for tax loss carry forwards to the extent that the realization of the related tax benefits through the future taxable profits is probable.

As of December 31, 2013, the Company did not recognise deferred income tax assets of €18.2 million in respect of losses amounting to €72.4 million. €17.4 million deferred income tax assets were not recognised as it is legally not permitted to carry forward or there are a number of anti-abuse provisions which limit the carry forward of losses in specific circumstances, €0.8 million deferred income tax assets were not recognised as it is not probable to be used. This portion of not recognised deferred income tax assets will expire until 2027 at the very latest.

As of December 31, 2012, the Company did not recognise deferred income tax assets of €18.3 million in respect of losses amounting to €73.3 million. €17.3 million deferred income tax assets were not recognised as it is legally not permitted to carry forward or there are a number of anti-abuse provisions which limit the carry forward of losses in specific circumstances, €1.1 million deferred income tax assets were not recognised as it is not probable to be used.

Remaining net operating losses at each year end were experienced in the following jurisdictions:

		As of December 31,		
		2013		2012
		(in thousands)		
Austria	€	257,302	€	263,224
Germany		12,457		12,791
North America		10,968		12,650
Other		40,118		41,075
	€	320,845	€	329,740

As of December 31, 2013 and 2012, the carry forward of net operating losses of €69.7 million and €69.1 million, respectively, is legally not permitted or limited through a number of anti-abuse provisions.

Austria and Germany allow an unlimited carry forward of net operating losses, whereas the United States allow 20 years for net operating loss carry forwards. The Company recognised deferred tax assets at the amount the Company believes is probable to be realized considering future taxable income and feasible tax planning strategies.

Austria	€	5,656	€	2,309
Non-Austria		2,048		2,892
Total income before income taxes	€	7,703	€	5,201

Note 22 - Related Party Transactions

Head Sports Holdings N.V. and its shareholders controlled 61,089,243 (2012: 61,089,243) shares, or approximately 66.28% (2012: 66.28%) of the Company's issued shares, as of December 31, 2013. Head Sports Holdings N.V., a Netherlands Antilles corporation, and its shareholders are controlled by Mr. Johan Eliasch and his family members resulting in the ability to significantly influence and control the Company's operations.

The Company receives administrative services from corporations which are ultimately owned by the principal shareholder of the Company. Administrative expenses amounted to approximately €4.6 million for the year ended December 31, 2013 and 2012, respectively. The related party provides consulting, corporate finance, investor relations and legal services.

In July 2012, certain Austrian subsidiaries of the Company entered into a loan agreement with an Austrian Bank providing a maximum of €15.0 million (from July 1 until December 31) and of €3.0 million (from January 1 until June 30). This agreement expires on December 31, 2014 and requires the Company to achieve certain yearly financial covenants. The loan is secured by certain Austrian trade receivables as well as by the inventories of certain Austrian subsidiaries in various warehouses. In addition, Mr. Johan Eliasch, the Company´s CEO, granted a personal non-performance guarantee ("Ausfallsbürgschaft") up to a maximum amount of €5.0 million to ensure the fulfillment of the obligations of the subsidiaries of the Company under the loan. In the third quarter of 2013, this loan agreement was renegotiated. It was agreed to reduce the maximum amount available from July 1 until December 31 from €15.0 million to €10.0 million and to increase the personal non-performance guarantee of Mr. Johan Eliasch from a maximum amount of €5.0 million to a maximum amount of €10.0 million. At December 31, 2012 and 2013 the Company did not use this credit line.

In September 2011, Mr. Franz Klammer was appointed to the Supervisory Board of Head N.V. (see also Supervisory Board Report). In 2001, one of the Company´s subsidiaries and the Franz Klammer GmbH entered into an agency agreement committing Mr. Franz Klammer to use and promote some of the Company´s products. The agreement was limited until August 2013 with a yearly fee of €0.06 million. In August 2013, the agreement was extended until December 2016. For the year 2013, the yearly fee amounts to €0.06 million. For the years 2014, 2015 and 2016, the yearly fee amounts to €0.045 million.

In 2007, the Company established a joint venture distribution company, Mares Benelux B.V., in The Netherlands in which it held 50%. Mares Benelux B.V. operated as distributor of Mares products in the Benelux market. The investment of €0.01 million was accounted for using the equity method and was recognised in "Investments accounted for using the equity method". The Company granted a loan of €0.6 million to the newly established company. During 2012 Mares S.p.A. acquired the remaining 50% at a cost of €0.01 million and therefore became 100% shareholder of Mares Benelux B.V. and took over the diving distribution in the Benelux market. The loan of €0.6 million was repaid in 2012. The Company intends to liquidate Mares Benelux B.V. in 2014. The investment of €0.01 million is shown in "Other non-current assets" in the consolidated statement of financial position.

In October 2011, the Company signed an agreement to set up a distribution company for diving products in Japan in which it holds 50%. The Company is an associate in accordance with IAS 28 "Investments in Associates and Joint Ventures". This investment of €0.68 million was accounted for using the equity method and was recognised in "Investments accounted for

using the equity method". The agreement contains certain exit options which the Company granted to the partners. The Company valued and recognised the resulting liability of €0.2m as of December 31, 2011 in "Interest and other finance expense" and "Other long-term liabilities".
As of December 31, 2013 the liability decreased to €0.05 million and is still shown in "Other long-term liabilities" (see Note 17).

In the second quarter of 2013, the Company signed a Joint Venture Agreement to set up a distribution company for diving products in the Philippines in which it holds 40%. The investment of €0.24 million was accounted for using the equity method and was recognised in "Investments accounted for using the equity method".

The following table shows the development of investments in Joint Ventures:

	December 31,	
	2013	2012
	(in thousands)	
Balance as of January 1	€ 679	€ 679

	(in thousands)	
Salaries and other short-term employee benefits	€ 3,804	€ 3,742
Post-employment benefit	166	236
Share-based benefits	67	(115)
Total	€ 4,037	€ 3,863

Note 23 – Stock Option Plans

The Company accounts for its stock options in accordance with IFRS 2 and determined the Plan 2005 to be cash-settled. Once vested under the Plans' terms as disclosed and exercised, the participants are issued depository receipts indexed to Head N.V. shares held by the Stichting (see Note 12 for description of Stichting). Upon settlement of the depository receipts, participants are only entitled to receive a cash payment subject to having requested the Stichting to sell the shares underlying the depository receipt to the market or upon exercise of the call option by Head N.V. The call option may be exercised at the time the participant resigns or employment is terminated. The settlement scheme established by the Company and the Stichting only allows for cash settlement and neither the Company nor the Stichting have an option to settle in shares.

The stock option plans resulted in a non-cash compensation expense of €0.1 million in 2013 mainly due to the increase of the share price at December 31, 2013 compared to December 31, 2012. In 2012, the non-cash compensation income amounted to €0.1 million mainly due to a decreased volatility in the share price in 2012 compared to 2011.

Plan 2005

In May 2005, at the Annual General Meeting the shareholders approved the Head N.V. Executive Stock Option Plan 2005 ("Plan 2005"). The Plan 2005 provides for grants of 3,874,691 stock options to certain officers and key employees of the Company and its subsidiaries. In accordance with IFRS 2 the Plan 2005 is treated as cash-settled share-based plan, as participants have no right to receive shares. As of December 31, 2013, a total of 3,669,346 options were granted under the terms of the Plan 2005. The Company records share-based compensation expense on each balance sheet date based on the fair values of the stock options computed using the Black and Scholes option pricing model. As at December 31, 2013, the weighted-average fair value of the grant was €0.15 (2012: €0.12), which was estimated using the following assumptions: no dividends, expected volatility of 28.22% (2012: 36.86%), expected term of 1.7 years (2012: 2.7 years), share price of €1.75 (2012: €1.28) and risk-free interest rate of 2.86% (2012: 2.20%). The volatility is based on statistical analysis of daily share prices over the last year. As of December 31, 2013 the company records a liability of €0.5 million (2012: €0.4 million).

The exercise price for all stock options granted under the Plan 2005 was fixed at inception of the Plan 2005 at €2.168. Options generally vest over a period of 4 years. The Chairman and Chief Executive Officer received 1,937,346 options under this grant. Options have a maximum term of 10 years. As at December 31, 2013, 205,345 (2012: 205,345) options were available for grant under the Plan 2005 and 3,212,096 options are currently exercisable. As of December 31, 2013 and 2012, the total intrinsic value of the liability was zero.

	Number of options	Weighted average exercise price
Balance, December 31, 2011	3,311,346	€ 2.168
Forfeiture during 2012	(43,250)	€ 2.168

Note 28 – Cash and cash equivalents

As at December 31, 2013 and 2012, cash and cash equivalents contains cash of €71.8 million and €38.6 million, respectively and restricted cash of €6.5 million and €2.6 million, respectively representing deposits pledged as collateral and in 2013 including €5.0 million deposited on an escrow account.

Note 29 – Earnings per Share – Basic and Diluted

	For the Years Ended December 31,	
	2013	2012 *restated*
	(in thousands, except per share data)	
Profit for the year	€ 5,296	€ 2,506
Weighted average number of ordinary shares in issue	83,519	83,519
Earnings per share - basic and diluted	€ 0.06	€ 0.03

Note 30 – Principal Accountant Fees and Services

PricewaterhouseCoopers (PwC) has served as the Company's independent public auditors for each of the years ended in the two-year period ended December 31, 2013. The following table presents the aggregate fees for professional audit services and other services rendered by PricewaterhouseCoopers in 2013 and 2012 (in thousands):

	For the Years Ended December 31	
	2013	2012
Audit Fees	€ 362	€ 401
Audit-Related Fees	--	10
Tax Fees	267	194
All Other Fees	52	27
Total Fees	€ 681	€ 632

Audit Fees primarily relate to the audit of Head N.V.'s Annual Consolidated and Company financial statements set forth in our Annual Report and other services normally provided in connection with statutory and regulatory filings, which mainly include the statutory audits of financial statements of our subsidiaries.

Audit-Related Fees consist of fees incurred for assurance and related services that are reasonably related to the performance of the audit or review of the Company's financial statements or that are traditionally performed by the external auditor, and include consultations concerning financial accounting and reporting standards.

Tax Fees comprise tax services for corporate income tax compliance and other tax advisory services.

All Other Fees represent professional services provided for services not directly supporting financial statement audits.

Note 31 – Subsequent Events

Liability against venture partner

In the third quarter of 2013, it was agreed that the Company will acquire the 17% interest of its venture partner as of January 1, 2014 (see Note 15).

Conditional Offer to Buy Back Shares

On December 13, 2013, the Company announced that it has commenced a cash Offer to repurchase up to 22,429,265 Shares of its share capital at a price of €1.90 per Share. The Offer is contingent upon the acceptance by shareholders representing at least 19,214,042 Shares, although Head has the right to waive this contingency. Full details of the Offer, including a number of terms and conditions, can be found on our website. On December 27, 2013, on January 21, 2014, and on February 11, 2014, the Company announced that it has decided to extend the Offer Period. On March 4, 2014, the Company announced that it has decided to extend the Offer Period for a final time until March 21, 2014.

Acquisition of Concept Systems International GmbH and its subsidiaries

As per January 1, 2014, Head closed a transaction to acquire 100% of the shares of Concept Systems International GmbH, which holds the trademarks of SSI (Scuba Schools International) and 100% of SSI GmbH, Germany (SSI-GmbH) and Concept Systems, Inc., USA (CSI-Inc), SSI's two operational entities. SSI provides training-material and scuba dive certification for divers, dive instructors, and dive centers around the world. SSI is represented in more than 110 countries.

As result of this transaction, the Company expects to increase its presence in the markets where the acquired entities are currently operating and aims to add value to both brands and leverage synergies.

The purchase price amounted to approximately €5.0 million excluding a contingent bonus-payment.

The contingent bonus-payment arrangement requires the Company to pay a certain percentage of the growth of equipment sales in the period from January 1, 2014, through December 31, 2017.

The Company is not in the position to disclose any quantitative information at the time the financial statements of the Company are authorized for issue. Due to the fact that no reliable financial statements of the acquiree are available, the initial accounting of the business combination is incomplete at this time.

Acquisition-related costs amounted to €0.2 million and have been charged to general and administrative expenses in the consolidated income statement for the year ended December 31, 2013.

Acquisition of Catis s.r.o. and its subsidiary

On January 1, 2014, the Company completed the acquisition of 100% of shares of a company called Catis s.r.o. and its subsidiary called Sitac s.r.o, both located in Czech Republic. Catis has historically assembled between 1.0 and 1.5 million bindings for Head each year.

As a result of this transaction, the Company expects to reduce costs and improve the efficiency in the production of alpine ski bindings.

The goodwill of €3.0 million arising from the acquisition is attributable to economies of scale expected from combining the operation of the acquired entity. The goodwill is not expected to be deductible for income tax purposes.

Acquisition-related costs of €0.1 million have been charged to cost of sales in the consolidated income statement for the year ended December 31, 2013.

The table below summarises the consideration paid for Catis s.r.o and its subsidiary, the fair value of assets acquired and liabilities assumed (in thousands):

Total consideration paid in cash	€	4,950
Recognised amounts of identifiable assets acquired and liabilities assumed:		
Property, plant and equipment		1,956
Accounts receivables		96
Cash and cash equivalents and prepaid expenses		145
Accounts payables		203
Total identifiable net assets	€	1,994
Goodwill	€	2,956

HEAD N.V.
NOTES TO THE COMPANY FINANCIAL STATEMENTS

Note 1 – General information

The Company is a public limited liability company incorporated under the laws of The Netherlands and acts as a holding and finance company for the Head group and as a Sales Agent for the distribution of winter and racquet sport products in Benelux. For further information, it is referred to Note 1 of the consolidated financial statements.

Note 2 - Summary of Significant Accounting Policies

These accompanying company financial statements are prepared in conformity with International Financial Reporting Standards as adopted by the European Union ("EU") ("IFRS") and Book 2 Title 9 of The Netherlands Civil Code, based on Section 362.8 and 362.9. For a description of the accounting policies, it is referred to Note 2: Summary of Significant Accounting Policies in the consolidated financial statements for the year ended December 31, 2013.

The investment in subsidiary is stated at acquisition cost which is the fair value at the date of acquisition. If an investment in subsidiaries is impaired, it is measured at its impaired value; any write-offs are disclosed in the income statement.

Note 3 – Investments in Subsidiary

The following investment is stated under the cost method:

Name of investment	Legal Seat	% owned
Head Holding Unternehmensbeteiligung GmbH	Vienna, Austria	100

Financial fixed assets consist of the following:

	Book value January 1, 2013	Cost of assets acquired	Book value of disposed assets	Income from participating interest	Book value December 31, 2013
			(in thousands)		
Investment in Subsidiary......	€ 139,432	€ --	€ --	€ --	€ 139,432

No impairment loss on this investment has been recorded.

Note 4 - Financial risk management and critical accounting estimates and judgements

The company manages its financial risks for the group as a whole. For a detailed description of financial risk management and critical accounting estimates and judgements, it is referred to Note 3 and 4 of the consolidated financial statements. The Company continues to make losses from its operation and is depending on the dividend income from its subsidiary, Head Holding Unternehmensbeteiligung GmbH.

Management Board				
Johan Eliasch	€ 547	€ --	€ --	€ (82)
Günter Hagspiel	426	136	186	(3)
Ralf Bernhart	343	--	--	33
George Nicolai	10	--	--	--
	€ 1,326	€ 136	€ 186	€ (53)
Supervisory Board				
Viktor Klima	€ 15	€ --	€ --	€ --
Jürgen Hintz	23	--	--	--
Franz Klammer	--	--	--	--
	€ 39	€ --	€ --	€ --

The share-based compensation expense 2013 results from the increase in fair value of the liability for the already existing plans against option holders mainly due to the increase of the share price at December 31, 2013 compared to December 31, 2012. The share-based compensation income 2012 results from the decrease in fair value of the liability for the already existing plans against option holders due to the decrease of the volatility of the Company's share price in 2012 compared to 2011. The share-based compensation expense for

Mr. Bernhart in 2012 results from the increase of the share price until the settlement of his depository receipts from the 1998 stock option plan. None of our Management Board members or Supervisory Board members has service contracts that provide for benefits upon termination of employment. Except for Mr. Günter Hagspiel, there are no amounts accrued to provide members of the Management Board or the Supervisory Board with pension, retirement or similar benefits. As reflected in the table above, the company incurred expenses of €0.2 million for future payments and had accrued severance benefits and bonus of €0.4 million as at December 31, 2013.

Under the Head N.V. Executive Stock Option Plan 2005 described the Company has issued options to purchase an aggregate of 2,087,346 depositary receipts representing ordinary shares to its Management Board members. For the year ended December 31, 2013, share-based compensation expense amounted to €0.1 million (2012: income of €0.1 million). The exercise price for all stock options was fixed at inception of the Plan. The vesting period was four years.

The table below shows the details of the Executive Option Plans for 2012 and 2013:

	Exercise price at the issuance	Number of non-exercised options at beginning of the year	Number of written options	Number of exercised options	Exercise price	Number of non-exercised options at the end of the year
Option Plan 2005						
Johan Eliasch	€2.17	1,937,346	--	--	€2.17	1,937,346
Günter Hagspiel	€2.17	75,000	--	--	€2.17	75,000
Ralf Bernhart	€2.17	75,000	--	--	€2.17	75,000

Note 7 – Reconciliation of Shareholders' Equity

The table below shows a reconciliation of company shareholders' equity and consolidated shareholders' equity and net income:

	For the Years Ended December 31, 2013	2012 *restated*
	(in thousands)	
Result for the year	€ (3,157)	€ 3,835
Net income (loss) from participating interest	8,453	(1,328)
Net income	€ 5,296	€ 2,506

	For the Years Ended December 31, 2013	2012 *restated*
	(in thousands)	
Shareholders' equity	€ 141,143	€ 144,300
Retained earnings from participating interest	32,253	26,986
Shareholders' equity consolidated	€ 173,396	€ 171,286

Note 8 – Shareholders' Equity

The Company is a Naamloze Vennootschap ("N.V."), a Dutch public Company with limited liability. The registered capital of a N.V. can be in the form of bearer shares or registered shares. The minimum registered and authorized capital requirement is €225,000 and the minimum paid in capital requirement for a N.V. is €45,000. Share premium include additional paid-in capital.

At the general meeting of shareholders on May 27, 2010, the resolution was taken to increase the authorized share capital to €4.000.000. It is divided into 200,000,000 ordinary shares with a nominal value of €0.01 per share and 200,000,000 preference shares with a nominal value of €0.01 per share.

Dividends

In 2013 and 2012 the Company did not pay a dividend.

Treasury Shares

Pursuant to resolutions which were approved on April 25, 2013, the Board of Management is authorized to buy back a maximum of 50% of the Company's issued share capital during a period of 18 months.

The table below shows the movement in the number of treasury shares:

	As of December 31,	
	2013	2012
	(in thousands)	
Balance as of January 1	8,396	8,396
Share Buy Backs	--	--
Balance as of December 31	8,396	8,396

Note 9 – Expenses by Nature

The table below provides details to the incurred selling, marketing and administrative expenses:

	For the Years Ended December 31,	
	2013	2012
	(in thousands)	
Management fees	€ 2,826	€ 2,781
Employee costs	238	292
Legal, audit and consulting	223	187
D&O insurance	64	54
Other	59	(14)
Total operative expenses	€ 3,410	€ 3,301

Note 10 – Income tax

The total loss available for tax loss carry forward at the end of 2013 provided that the Dutch tax authorities agree with the 2010, 2011, 2012 and 2013 corporate income tax return is

€34.9 million. The Company does not report any tax as it continuously incurs tax losses from 2000 and no deferred tax assets are recognised.

Note 11 – Related Party Transactions

Head Sports Holdings N.V. and its shareholders controlled 61,089,243 (2012: 61,089,243) shares, or approximately 66.28% (2012: 66.28%) of the Company's issued shares, as of December 31, 2013. Head Sports Holdings N.V., a Netherlands Antilles corporation, and its shareholders are controlled by Mr. Johan Eliasch and his family members resulting in the ability to significantly influence and control the Company's operations.

The Company receives administrative services for the group from corporations which are ultimately owned by the principal shareholder of the Company. Payments for this services from the group amounted to approximately €4.6 million for the year ended December 31, 2013 and 2012, respectively. The related party provides consulting, corporate finance, investor relations and legal services.

The Company received product deliveries of €0.6 million (2012: €1.9 million) for the distribution in The Netherlands from a group company. As of December 31, 2013, the Company recorded receivables against group companies of €1.8 million compared to €4.9 million as of December 31, 2012.

The Company has the obligation to provide own shares to the Stichting (see Note 12 of the consolidated financial statements for description of Stichting) in relation to the Company's stock option plans.

HEAD N.V.
OTHER INFORMATION

Auditor's Report

The report of the auditor, PricewaterhouseCoopers Accountants N.V., is presented on page 117 of this report.

Subsequent Events

For information regarding the subsequent events, it is referred to Note 31 of the consolidated financial statements.

Appropriation of Result – Provisions in Company's Statutes

The Company's articles of association provide that the appropriation of results is at the disposal of the Board of Management.

Appropriation of Result

The Board of Management is proposing with due observance of the Company's policy on additions to reserves and on distribution of profits to allocate the result for the year to retained earnings. This proposal is not yet reflected in the accounts.

Independent auditor´s report

To: the general meeting of Head N.V.

Report on the financial statements

We have audited the accompanying financial statements 2013 as set out on pages 38 to 115 of Head N.V., Rotterdam, which comprise the consolidated and company statement of financial position as at 31 December 2013, the consolidated and company statements of comprehensive income, changes in equity and cash flows for the year then ended and the notes, comprising a summary of significant accounting policies and other explanatory information.

Management's responsibility
Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards as adopted by the European Union and with Part 9 of Book 2 of the Dutch Civil Code, and for the preparation of the directors' report in accordance with Part 9 of Book 2 of the Dutch Civil Code. Furthermore, management is responsible for such internal control as it determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility
Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. This requires that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the

circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements give a true and fair view of the financial position of Head N.V. as at 31 December 2013, and of its result and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and with Part 9 of Book 2 of the Dutch Civil Code.

Report on other legal and regulatory requirements

Pursuant to the legal requirement under Section 2: 393 sub 5 at e and f of the Dutch Civil Code, we have no deficiencies to report as a result of our examination whether the directors' report, to the extent we can assess, has been prepared in accordance with Part 9 of Book 2 of this Code, and whether the information as required under Section 2: 392 sub 1 at b-h has been annexed. Further we report that the directors' report, to the extent we can assess, is consistent with the financial statements as required by Section 2: 391 sub 4 of the Dutch Civil Code.

RELEASE BY THE MANAGEMENT BOARD

Statement by the Management Board according to the European Transparency Guideline (implemented in Section 5:25c Dutch Financial Supervision Act)

We confirm to the best of our knowledge that the consolidated financial statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the group as required by the applicable accounting standards and that the directors' report gives a true and fair view of the development and performance of the business and the position of the group, together with a description of the principal risks and uncertainties the group faces.

We confirm to the best of our knowledge that the separate financial statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the parent company as required by the applicable accounting standards and that the directors' report gives a true and fair view of the development and performance of the business and the position of the company, together with a description of the principal risks and uncertainties the company faces.
